TruSurround™ by SRS ®

TruSurround is a trademark of SRS Labs, Inc. SRS and the SRS symbol are registered trademarks of SRS Labs, Inc. in the United States and in select foreign countries. SRS and TruSurround are incorporated under license from SRS Labs, Inc. and are protected under United States Patent Nos. 4,748,669 and 4,841,572 with numerous additional issued and pending foreign patents. Purchase of this product does not convey the right to sell recordings made with the TruSurround technology.

SRS (SOUND RETRIEVAL SYSTEM)

The SRS (SOUND RETRIEVAL SYSTEM) is manufactured by Sony Corporation under license from SRS Labs, Inc. It is covered by U.S. Patent No. 4,748,669. Other U.S. and foreign patents pending.

The word 'SRS' and the SRS symbol are registered trademarks of SRS Labs, Inc. BBE and BBE symbol are trademarks of BBE Sound, Inc. and are licensed by BBE Sound, Inc. under U.S. Patent No. 4,638,258 and 4,482,866.

Design and specifications are subject to change without notice.

WARNINGS AND CAUTIONS

CAUTION

Short circuit the anode of the picture tube and the anode cap to the metal chassis, CRT shield, or carbon painted on the CRT, after removing the anode.

WARNING!!

An isolation transformer should be used during any service to avoid possible shock hazard, because of live chassis. The chassis of this receiver is directly connected to the AC power line.

⚠ SAFETY-RELATED COMPONENT WARNING!!

Components identified by shading and ⚠ mark on the schematic diagrams, exploded views, and in the parts list are critical for safe operation. Replace these components with Sony parts whose part numbers appear as shown in this manual or in supplements published by Sony. Circuit adjustments that are critical for safe operation are identified in this manual. Follow these procedures whenever critical components are replaced or improper operation is suspected.

ATTENTION!!

Apres avoir deconnecte le cap de l'anode, court-circuiter l'anode du tube cathodique et celui de l'anode du cap au chassis metallique de l'appareil, ou la couche de carbone peinte sur le tube cathodique ou au blindage du tube cathodique.

Afin d'eviter tout risque d'electrocution provenant d'un châssis sous tension, un transformateur d'isolement doit etre utilisé lors de tout dépannage. Le châssis de ce récepteur est directement raccordé à l'alimentation du secteur.

⚠ ATTENTION AUX COMPOSANTS RELATIFS A LA SECURITE!!

Les composants identifies par une trame et par une marque ⚠ sur les schemas de principe, les vues explosees et les listes de pieces sont d'une importance critique pour la securite du fonctionnement. Ne les remplacer que par des composants Sony dont le numero de piece est indique dans le present manuel ou dans des supplements publies par Sony. Les reglages de circuit dont l'importance est critique pour la securite du fonctionnement sont identifies dans le present manuel. Suivre ces procedures lors de chaque remplacement de composants critiques, ou lorsqu'un mauvais fonctionnement suspecte.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly soldered connections. Check the entire board surface for solder splashes and bridges.

2. Check the interboard wiring to ensure that no wires are “pinched” or touching high-wattage resistors.

3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.

4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.

5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.

6. Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.

7. Check the B+ and HV to see if they are specified values. Make sure your instruments are accurate; be suspicious of your HV meter if sets always have low HV.

8. Check the antenna terminals, metal trim, “metallized” knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

Leakage Test

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers’ instructions to use these instructions.

2. A battery-operated AC milliampmeter. The Data Precision 245 digital multimeter is suitable for this job.

3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The “limit” indication is 0.75 V, so analog meters must have an accurate low voltage scale. The Simpson’s 250 and Sanwa SH-63TRD are examples of passive VOMs that are suitable. Nearly all battery-operated digital multimeters that have a 2 VAC range are suitable (see Figure A).

How to Find a Good Earth Ground

A cold-water pipe is a guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground. If the retaining screw is to be used as your earth ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms.

If a cold-water pipe is not accessible, connect a 60- to 100-watt trouble- light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side on the line; the lamp should light at normal brilliance if the screw is at ground potential (see Figure B).

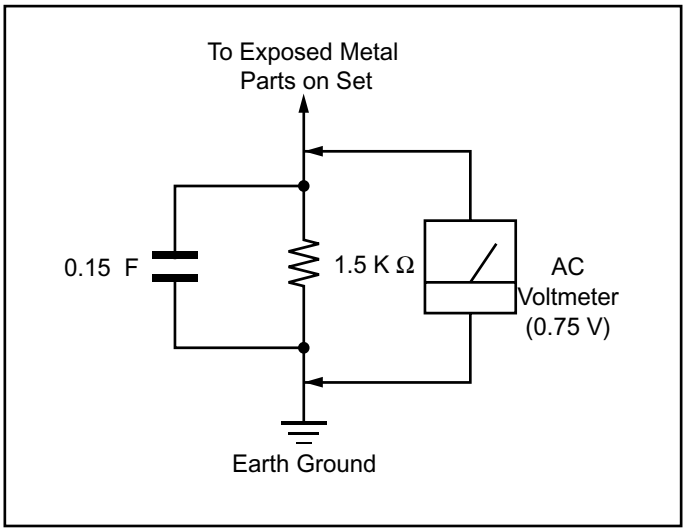

Figure A. Using an AC voltmeter to check AC leakage.

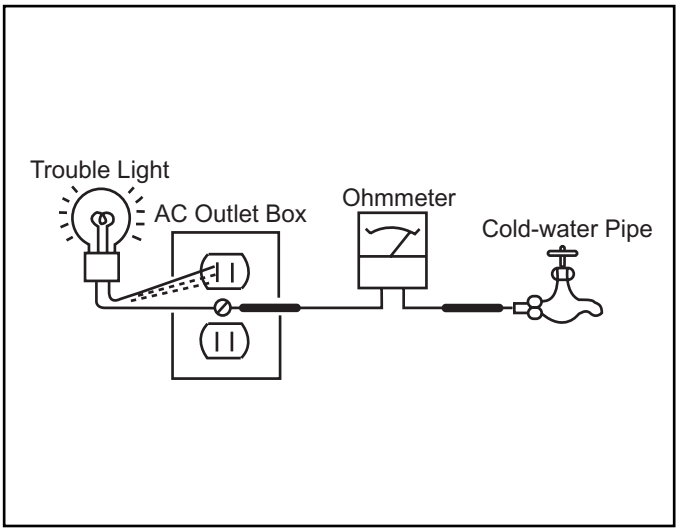

Figure B. Checking for earth ground.

SELF-DIAGNOSTIC FUNCTION

Self Diagnosis Supported model

The units in this manual contain a self-diagnostic function. If an error occurs, the STANDBY/TIMER LED will automatically begin to flash. The number of times the LED flashes translates to a probable source of the problem. A definition of the STANDBY/TIMER LED flash indicators is listed in the instruction manual for the user's knowledge and reference. If an error symptom cannot be reproduced, the Remote Commander can be used to review the failure occurrence data stored in memory to reveal past problems and how often these problems occur.

Diagnostic Test Indicators

When an error occurs, the STANDBY/TIMER LED will flash a set number of times to indicate the possible cause of the problem. If there is more than one error, the LED will identify the first of the problem areas.

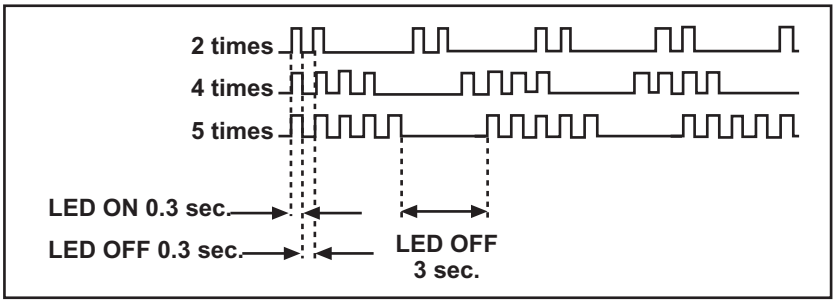
Results for all of the following diagnostic items are displayed on screen. No error has occurred if the screen displays a "0".

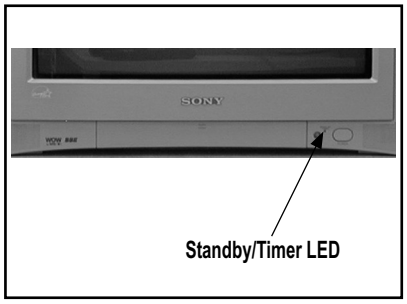
Diagnostic Item Description	No. of times STANDBY/ TIMER lamp flashes	Self-Diagnositc Display/ Diagnostic Result	Probable Cause Location	Detected Symptoms
Power does not turn on	Does not light	————	• Power cord is not plugged in. • Fuse is burned out (F601). (A Board)	• Power does not come on. • No power is supplied to the TV. • AC Power supply is faulty.
+B overcurrent (OCP)*	2 times	2:0 or 2:1	• H.OUT (Q505) is shorted. (A Board) • IC2751 is shorted. (CW Board)	• Power does not come on. • Load on power line is shorted.
I-Prot	4 times	4:0 or 4:1	• +13V is not supplied. (A Board) • IC545 is faulty. (A Board)	• Has entered standby state after horizontal raster. • Vertical deflection pulse is stopped. • Power line is shorted or power supply is stopped.
IK (AKB)	5 times	5:0 or 5:1	• IC001 is faulty. (A Board) • Screen (G2) is improperly adjusted.**	• No raster is generated. • CRT Cathode current detection reference pulse output is small.

*If a +B overcurrent is detected, stoppage of the vertical deflection is detected simultaneously. The symptom that is diagnosed first by the mircrocontroller is displayed on the screen.

**Refer to Screen (G2) Adjustments in Section 2-4. of this manual.

Display of Standby/Timer LED Flash Count





Diagnostic Item	Flash Count*
+B Overcurrent	2 times
I-Prot	4 times
IK (AKB)	5 times

*One flash count is not used for self-diagnostic.

Stopping the Standby/Timer LED Flash

Turn off the power switch on the TV main unit or unplug the power cord from the outlet to stop the STANDBY/TIMER LAMP from flashing.

Self-Diagnostic Screen Display

For errors with symptoms such as “power sometimes shuts off” or “screen sometimes goes out” that cannot be confirmed, it is possible to bring up past occurrences of failure on the screen for confirmation.

To Bring Up Screen Test

In standby mode, press buttons on the Remote Commander sequentially, in rapid succession, as shown below:

Display ➡ Channel 5 ➡ Sound Volume - ➡ Power ON

⇧ Note that this differs from entering the Service Mode (Sound Volume +).

Self-Diagnostic Screen Display

SELF DIAGNOSTIC		
2:	+B OCP	0
3:	+B OVP	N/A
4:	VSTOP	0
5:	AKB	1
101:	WDT	N/A

Numeral “0” means that no fault was detected.

Numeral “1” means a fault was detected one time only.

Handling of Self-Diagnostic Screen Display

Since the diagnostic results displayed on the screen are not automatically cleared, always check the self-diagnostic screen during repairs. When you have completed the repairs, clear the result display to “0”.

Unless the result display is cleared to “0”, the self-diagnostic function will not be able to detect subsequent faults after completion of the repairs.

Clearing the Result Display

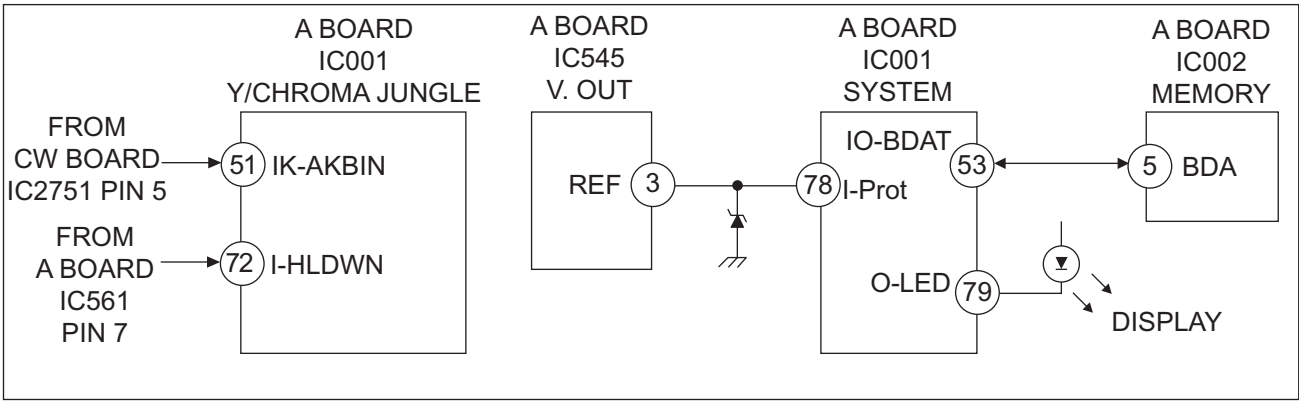
To clear the result display to “0”, press buttons on the Remote Commander sequentially when the diagnostic screen is displayed, as shown below:

Channel 8 ➡ ENTER

Quitting the Self-Diagnostic Screen

To quit the entire self-diagnostic screen, turn off the power switch on the Remote Commander or the main unit.

Self-Diagnostic Circuit



+B overcurrent (OCP)

Occurs when an overcurrent on the +B (135V) line is detected by pin 72 of IC001 (A Board). If the voltage of pin 72 of IC001 (A Board) is less than 1V when V.SYNC is more than seven verticals in a period, the unit will automatically turn off.

I-Prot

Occurs when an absence of the vertical deflection pulse is detected by pin 78 of IC001 (A Board). Power supply will shut down when waveform interval exceeds 2 seconds.

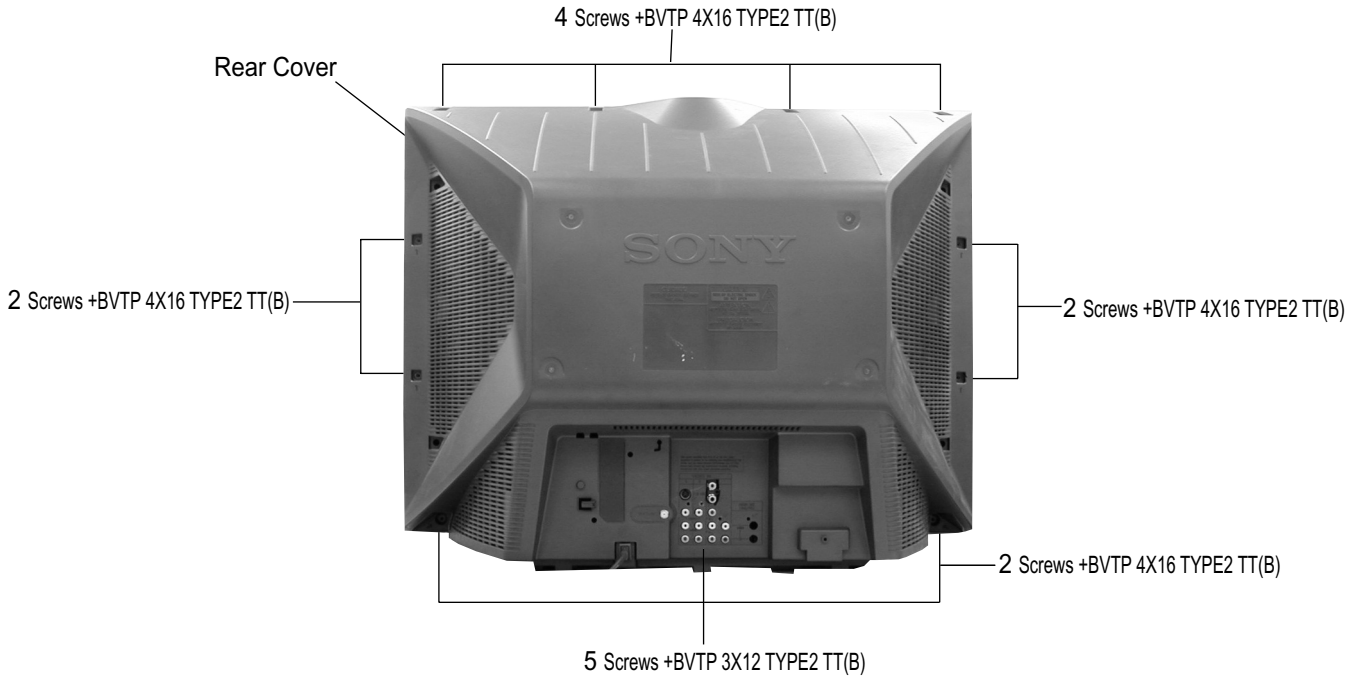
IK (AKB)

If the RGB levels* do not balance within 2 seconds after the power is turned on, this error will be detected by IC001 (A Board). TV will stay on, but there will be no picture.

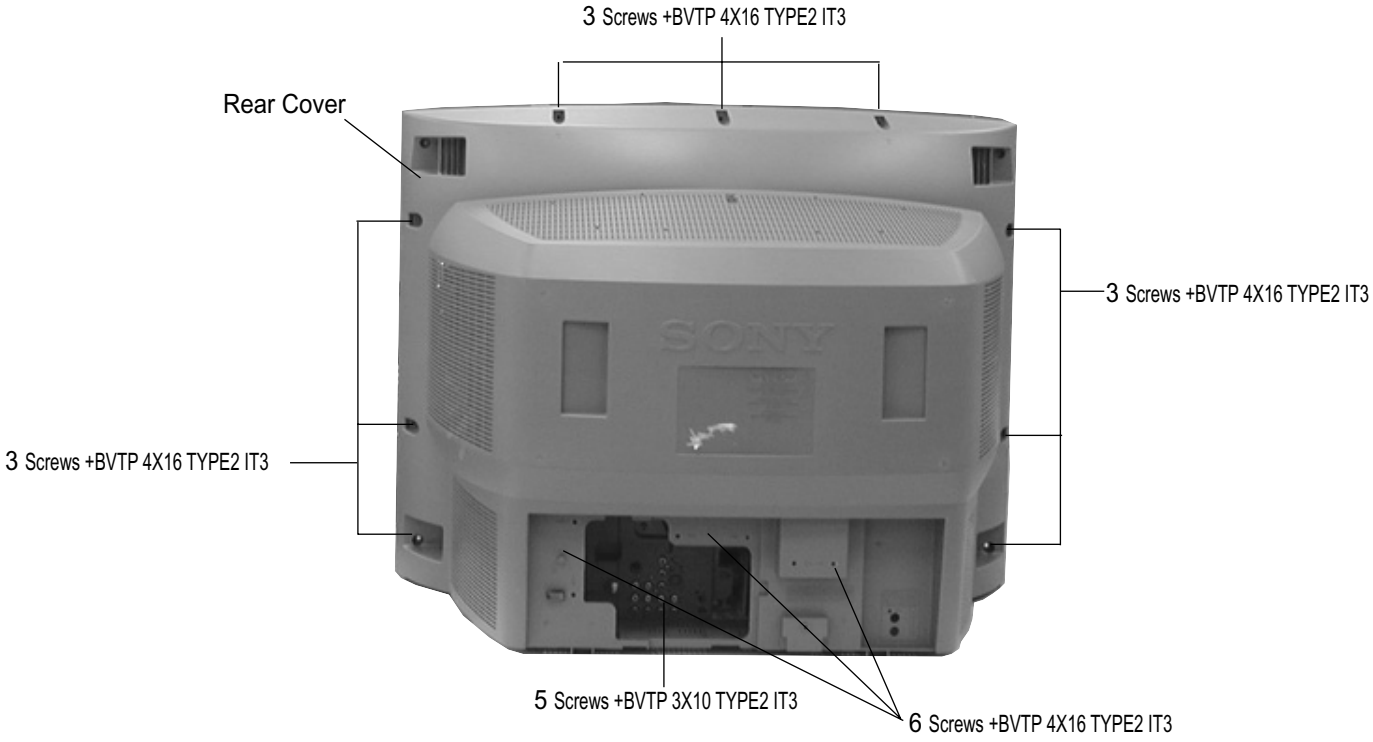
*(Refers to the RGB levels of the AKB detection Ref pulse that detects 1K).

SECTION 1: DISASSEMBLY

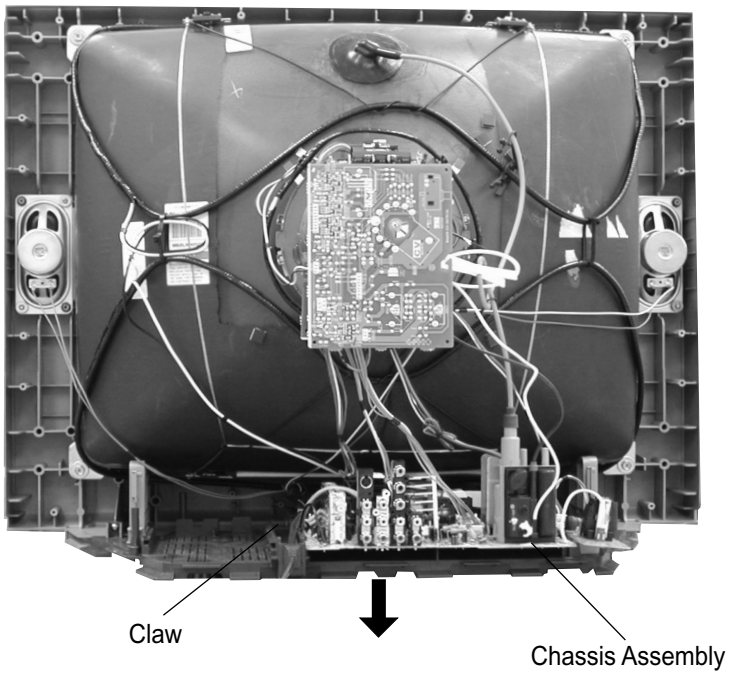
1-1. REAR COVER REMOVAL (ALL EXCEPT KV-29FA310)



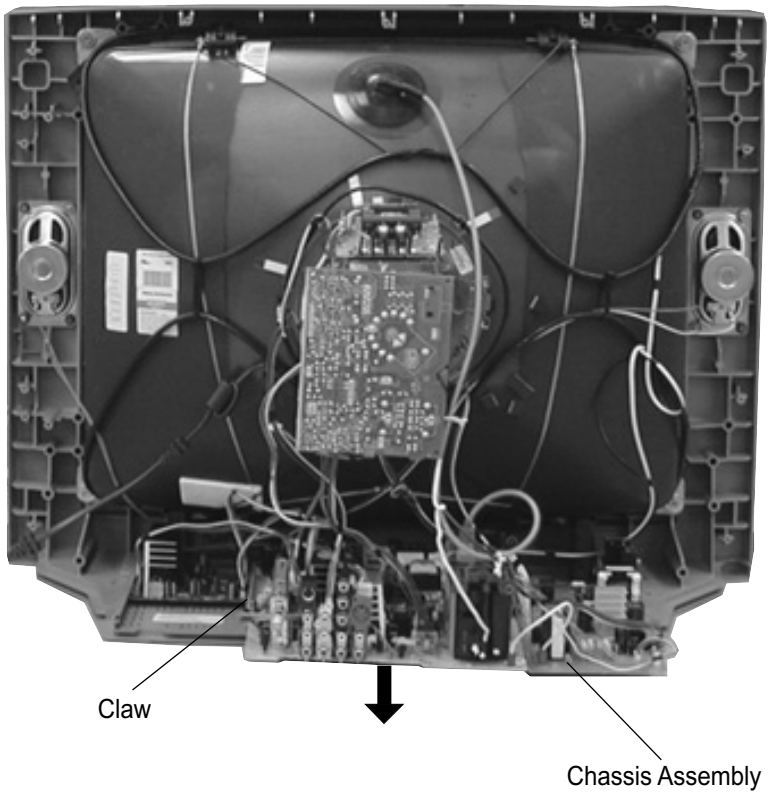
1-2. REAR COVER REMOVAL (KV-29FA310 ONLY)



1-3. CHASSIS ASSEMBLY REMOVAL (ALL EXCEPT KV-29FA310)



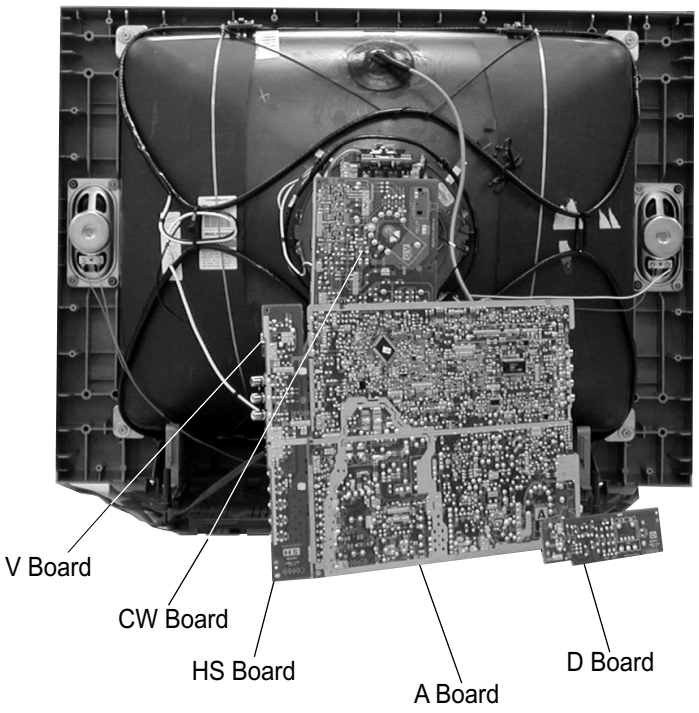
1-4. CHASSIS ASSEMBLY REMOVAL (KV-29FA310 ONLY)



1-5. SERVICE POSITION (ALL EXCEPT KV-29FA310)

① Press on catch tab to release A Board.

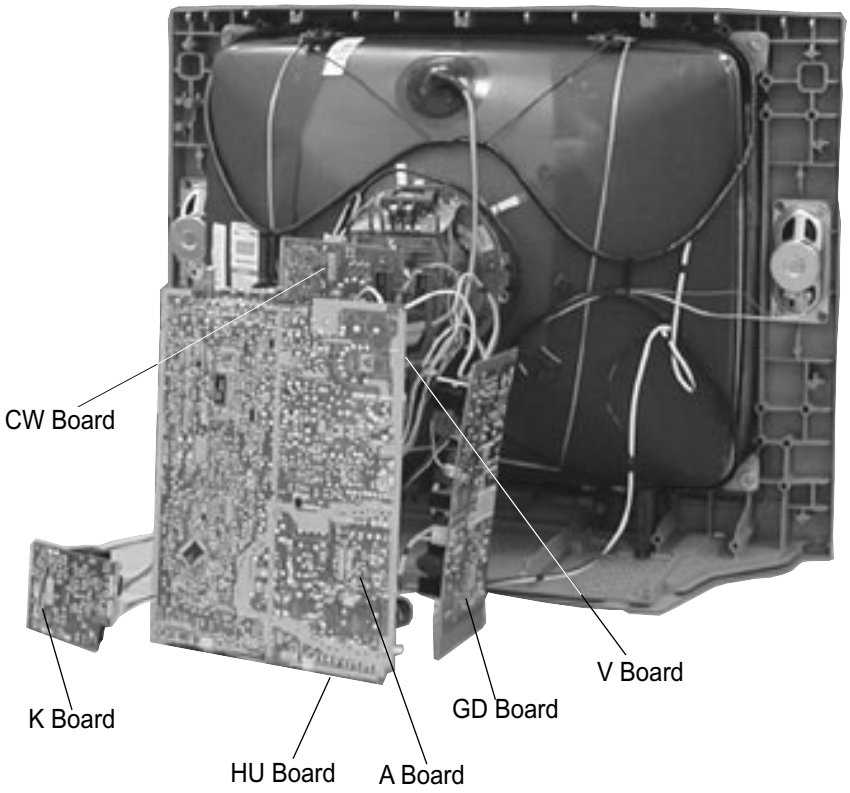
② Disconnect cables as needed to allow A Board to be removed.



1-6. SERVICE POSITION (KV-29FA310 ONLY)

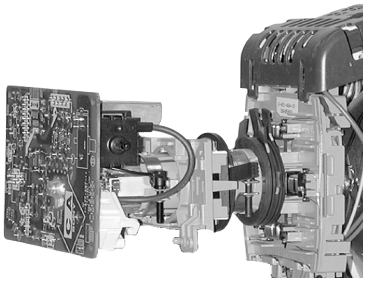
① Press on catch tab to release A Board.

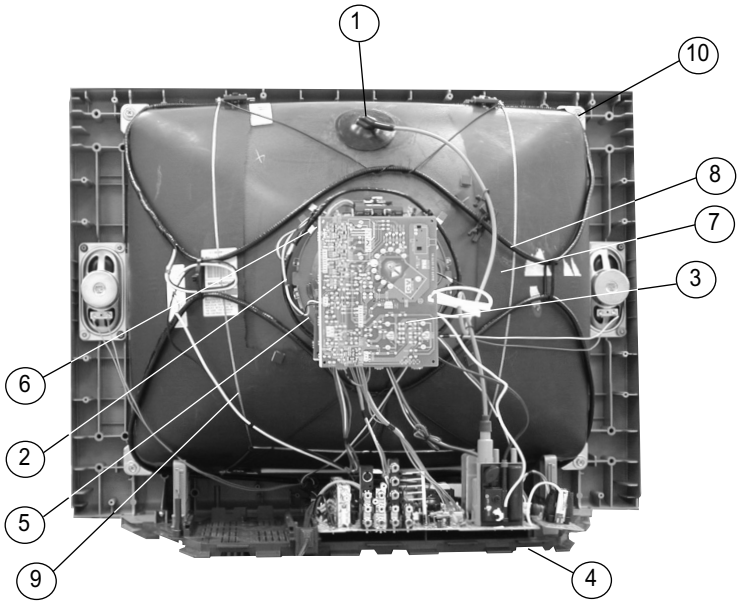
② Disconnect cables as needed to allow A Board to be removed.



1-7. PICTURE TUBE REMOVAL

WARNING: BEFORE REMOVING THE ANODE CAP
High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT before attempting to remove the anode cap. Short between anode and CRT coated earth ground strap.



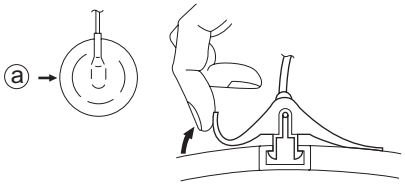


1. Discharge the anode of the CRT and remove the anode cap.
2. Unplug all interconnecting leads from the deflection yoke, neck assembly, degaussing coils and CRT grounding strap.
3. Remove the CW Board from the CRT.
4. Remove the chassis assembly.
5. Loosen the neck assembly fixing screw and remove.
6. Loosen the deflection yoke fixing screw and remove.
7. Place the set with the CRT face down on a cushion and remove the degaussing coil holders.
8. Remove the degaussing coils.
9. Remove the CRT grounding strap and spring tension devices.
10. Unscrew the four CRT fixing screws [located on each CRT corner] and remove the CRT [Take care not to handle the CRT by the neck].

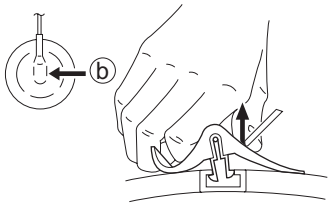
ANODE CAP REMOVAL PROCEDURE

WARNING: High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT **before** attempting to remove the anode cap. Short between anode and coated earth ground strap of CRT.
NOTE: After removing the anode cap, short circuit the anode of the picture tube and the anode cap to either the metal chassis, CRT shield, or carbon painted on the CRT.

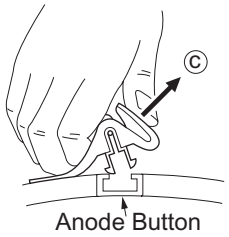
REMOVAL PROCEDURES



Turn up one side of the rubber cap in the direction indicated by arrow ⓐ .



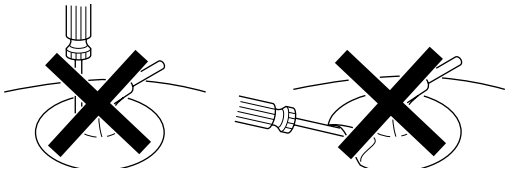
Use your thumb to pull the rubber cap firmly in the direction indicated by arrow ⓑ .



When one side of the rubber cap separates from the anode button, the anode cap can be removed by turning the rubber cap and pulling it in the direction of arrow ⓒ .

HOW TO HANDLE AN ANODE CAP

1. Do not use sharp objects which may cause damage to the surface of the anode cap.
2. To avoid damaging the anode cap, do not squeeze the rubber covering too hard. A material fitting called a shatter-hook terminal is built into the rubber.
3. Do not force turn the foot of the rubber cover. This may cause the shatter-hook terminal to protrude and damage the rubber.



SECTION 2: SET-UP ADJUSTMENTS

The following adjustments should be made when a complete realignment is required or a new picture tube is installed.

These adjustments should be performed with rated power supply voltage unless otherwise noted.

Set the controls as follows unless otherwise noted:
VIDEO MODE: Pro
PICTURE CONTROL: Normal
BRIGHTNESS CONTROL: Normal

Perform the adjustments in order as follows:

1. Beam Landing
2. Convergence
3. Focus
4. Screen (G2)
5. White Balance

Note Test Equipment Required:

1. Color Bar Pattern Generator
2. Degausser
3. DC Power Supply
4. Digital Multimeter

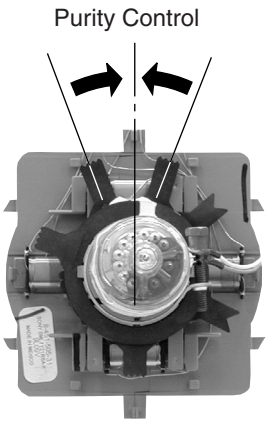
2-1. BEAM LANDING

Before beginning adjustment procedure:

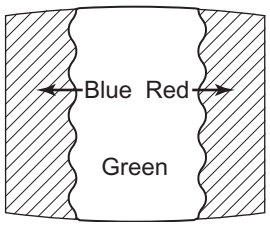
1. Degauss the entire screen.
2. Feed in the white pattern signal.

Adjustment Procedure

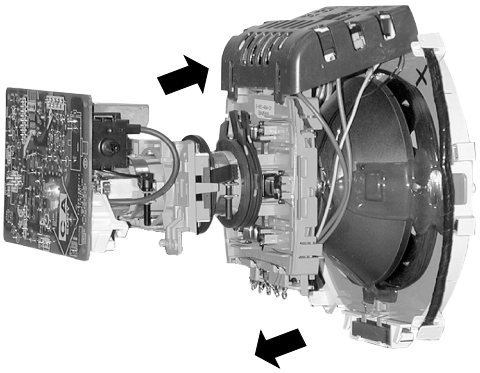
1. Input a raster signal with the pattern generator.
2. Loosen the deflection yoke mounting screw, and set the purity control to the center as shown below:

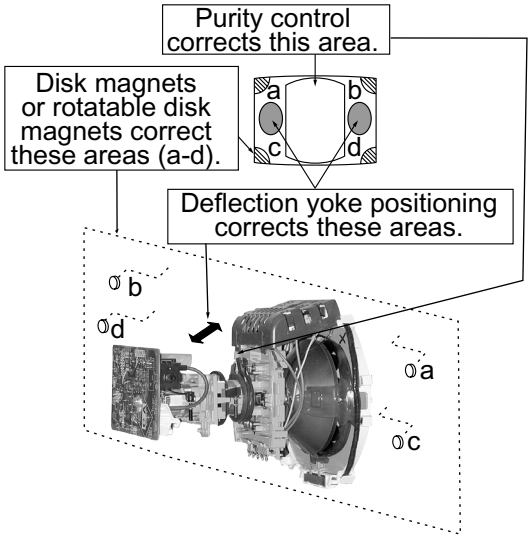


3. Turn the raster signal of the pattern generator to green.
4. Move the deflection yoke backward, and adjust with the purity control so that green is in the center and red and blue are even on both sides.



5. Move the deflection yoke forward, and adjust so that the entire screen becomes green.
6. Switch over the raster signal to red and blue and confirm the condition.
7. When the position of the deflection yoke is determined, tighten it with the deflection yoke mounting screw.
8. If landing at the corner is not right, adjust by using the disk magnets.





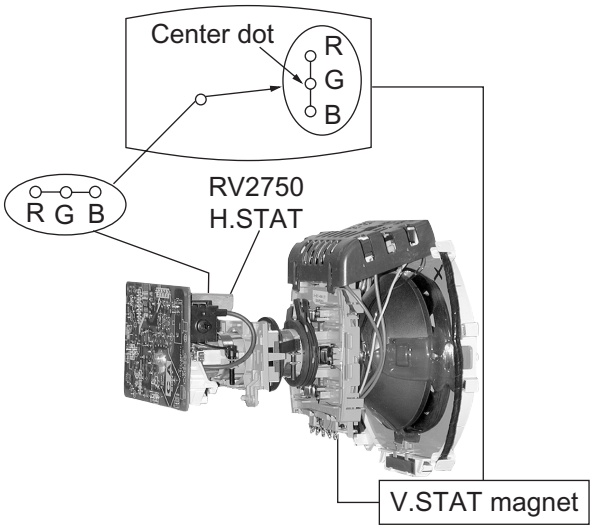
2-2. CONVERGENCE

Before starting convergence adjustments:

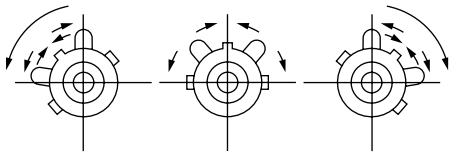
1 Perform FOCUS, VLIN and VSIZE adjustments.
2. Set BRIGHTNESS control to minimum.
3. Feed in dot pattern.

Vertical Static Convergence

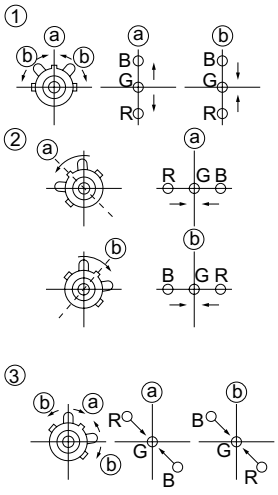
1. Adjust V. STAT magnet to converge red, green and blue dots in the center of the screen.



2. Tilt the V. STAT magnet and adjust static convergence to open or close the V. STAT magnet.



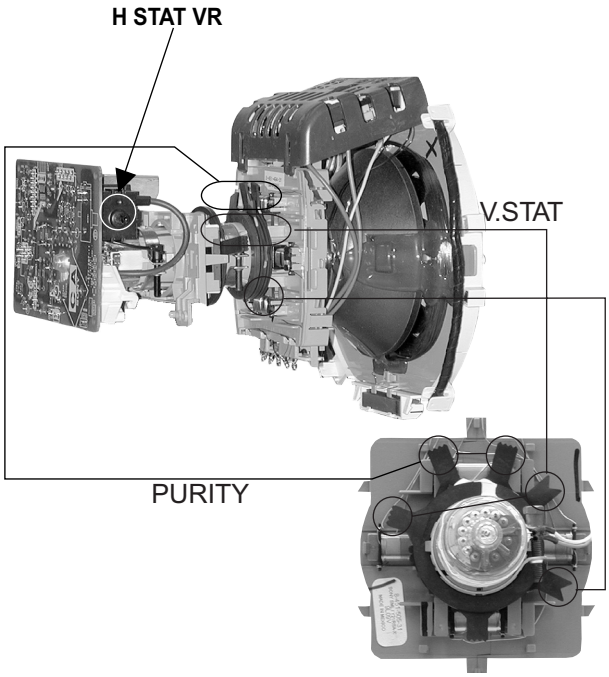
When the V. STAT magnet is moved in the direction of arrow a and b, red, green, and blue dots move as shown below:



Horizontal Static Convergence

If the blue dot does not converge with the red and green dots, perform the following:

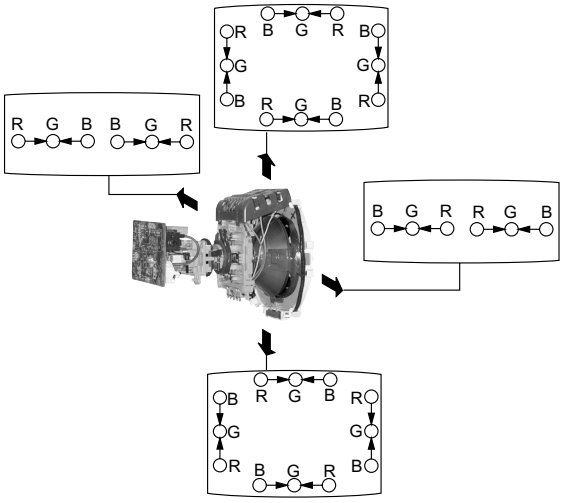
1. Move H STAT VR magnet (a) to correct insufficient H.Static convergence.



Dynamic Convergence Adjustment

Before performing this adjustment, perform Horizontal and Vertical Static Convergence Adjustment.

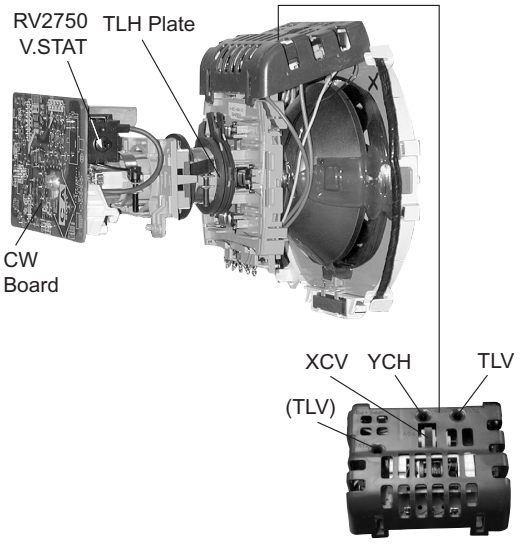
1. Slightly loosen deflection yoke screw.
2. Remove deflection yoke spacers.
3. Move the deflection yoke for best convergence as shown below:

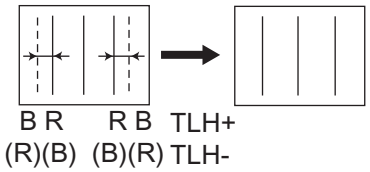


4. Tighten the deflection yoke screw.
5. Install the deflection yoke spacers.

TLH Plate Adjustment

1. Input crosshatch pattern.
2. Adjust PICTURE QUALITY to standard, PICTURE and BRIGHTNESS to 50%, and OTHER to standard.
3 Adjust the Horizontal Convergence of red and blue dots by tilting the TLH plate on the deflection yoke.

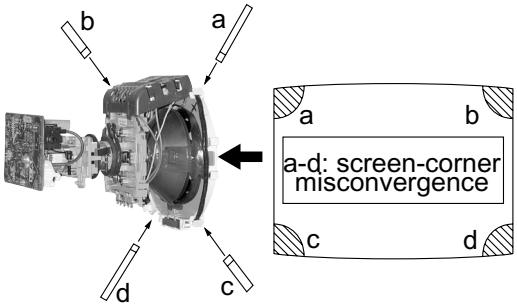




4. Adjust XCV core to balance X axis.
5. Adjust YCH VR to balance Y axis.
6. Adjust vertical red and blue convergence with V.TILT (TLV VR.)
   Note: Perform adjustment 3-6 while tracking items 1 and 2.

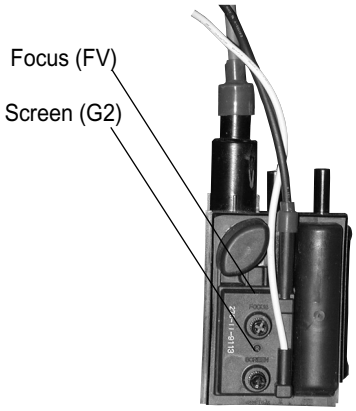
Screen-Corner Convergence

1. Affix a permalloy assembly corresponding to the misconverged areas:



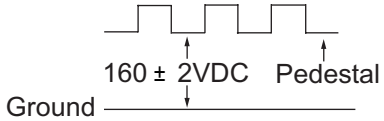
2-3. FOCUS

1. Adjust FOCUS control for best pictures.



2-4. SCREEN (G2)

1. Input a dot pattern.
2. Set the PICTURE and BRIGHTNESS controls at minimum and COLOR control at normal.
3. Adjust SBRT, GCUT, BCUT in service mode with an oscilloscope as shown below so that voltages on the red, green, and blue cathodes are 160 ± 2VDC.



4. Observe the screen and adjust SCREEN (G2) VR in FBT to obtain the faintly visible background of dot signal.

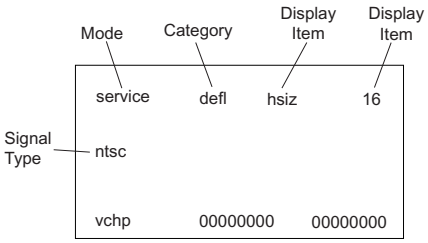
2-5. METHOD OF SETTING THE SERVICE ADJUSTMENT MODE

Service Mode Procedure

1. Standby mode (power off).
2. Press [Display] ➡ Channel [5] ➡ Sound Volume [+] ➡ Power on the Remote Commander (press each button within a second).

Service Adjustment Mode On

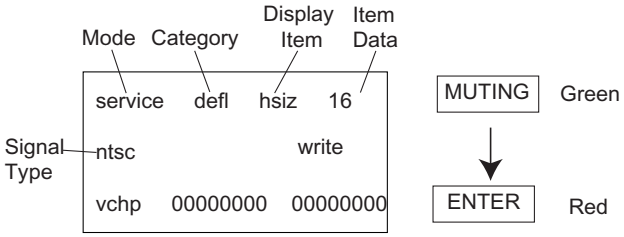
1. The CRT displays the time being adjusted.



2. Press [1] or [4] on the Remote Commander to select the time.
3. Press [3] or [6] on the Remote Commander to change the data.
4. Press [MUTING] then [ENTER] to save into the memory.

Service Adjustment Mode Memory

Turn the set off then on to exit Service Adjustment Mode.



2-6. WHITE BALANCE ADJUSTMENTS

1. Input an entire white signal with burst.
2. Set to Service Adjustment Mode.
3. Set the PICTURE and BRIGHTNESS to minimum.
4. Adjust with SBRT if necessary.
5. Select GCUT and BCUT with [1] and [4].
6. Adjust with [3] and [6] for the best white balance.
7. Set the PICTURE and BRIGHTNESS to maximum.
8. Select GDRV and BDRV with [1] and [4].
9. Adjust with [3] and [6] for the best white balance.
10. Press [MUTING] then [ENTER] to save into the memory.

SECTION 3: SAFETY RELATED ADJUSTMENTS

3-1. ⋈ R564 CONFIRMATION METHOD (HV HOLD-DOWN CONFIRMATION) AND READJUSTMENTS

The following adjustments should always be performed when replacing the following components which are marked with ◪ on the schematic diagram:

Part Replaced (◪)	Adjustment (⋈)
DY, T585, CRT, IC001, IC561, IC600, IC604, C506, C507, C508, C510, C511, C513, C514, L588, D566, D567, D568, PH602, R526, R564, R565, R566, R851, T510, T511…….....A Board	HV HOLD-DOWN R564

Preparation Before Confirmation

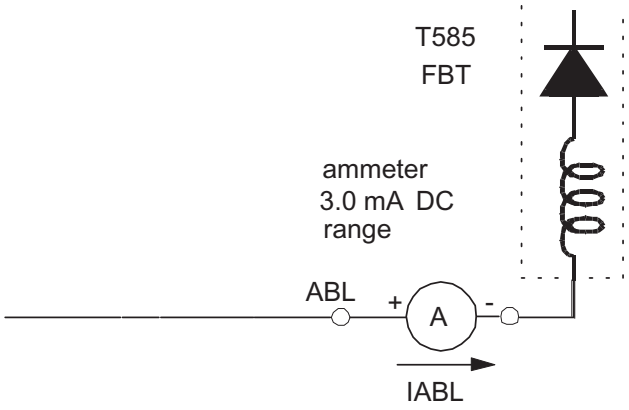
1. Using a Variac, apply AC input voltage: 120 ± 2 VAC.
2. Turn the POWER switch ON.
3. Input a white signal and set the PICTURE and BRIGHTNESS controls to maximum.
4. Confirm that the voltage between C566 (+) or TP30 and ground is more than 99VDC.

Hold-Down Operation Confirmation

1. Connect the current meter between Pin 11 of the FBT (T585) and the PWB land where Pin 11 would normally attach (See Figure 1 on the next page).
2. Input a dot signal and adjust the ABL current to follow with the PICTURE and BRIGHTNESS control: IABL = 140 ± 100µA.
3. Confirm the voltage of A Board TP-23 is 135.6 ± 1.0VDC.
4. Connect the digital voltmeter and the DC power supply via Diode 1SS119 to C566 (+) and ground (See Figure 1 on next page).
5. Increase the DC power voltage gradually until the picture blanks out.
6. Turn DC power source off immediately.
7. Read the digital voltmeter indication (Standard ≤ 114.6 +OVDC/-0.3DC).
8. Input 100 IRE White Signal and adjust the ABL current to follow with the PICTURE and BRIGHTNESS control: IABL = 1820µA ± 200µA.
9. Repeat steps 4 through 7.

Hold-Down Readjustment

If the setting indicated in Step 2 of Hold-Down Operation Confirmation cannot be met, readjustment should be performed by altering the resistance value of R564 component marked with ⋈.



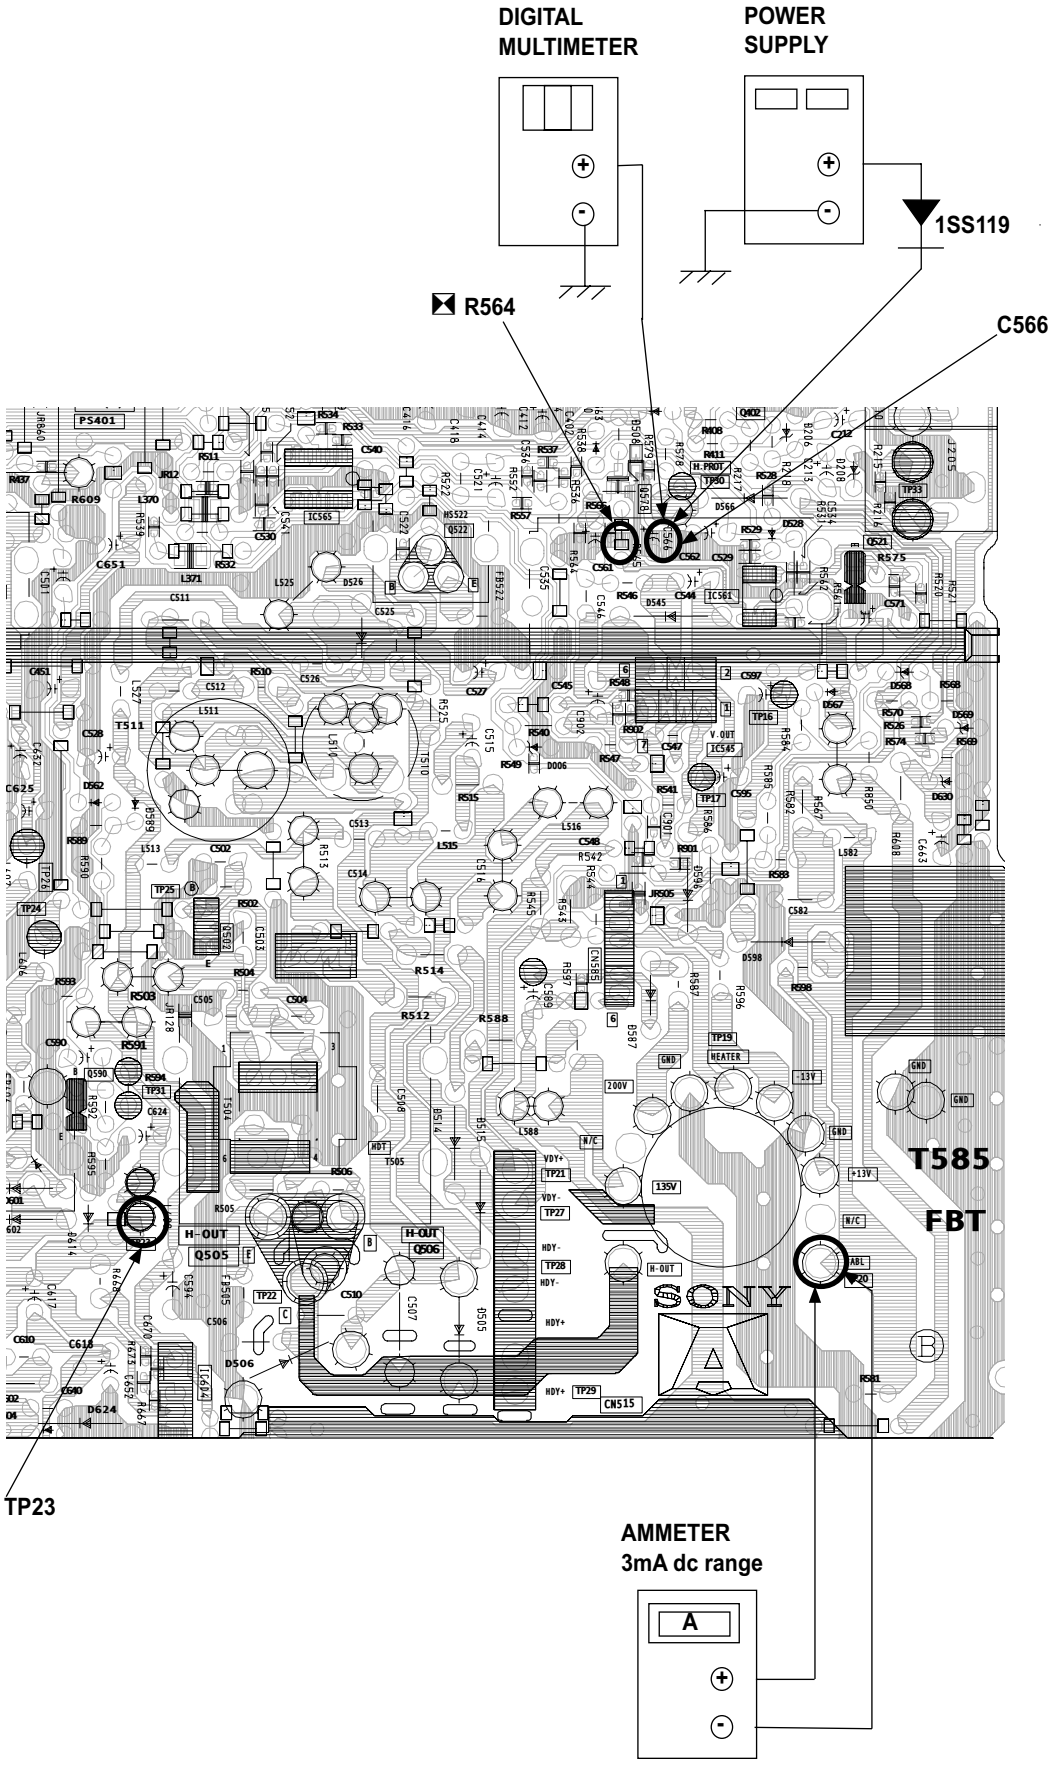
3-2. B+ VOLTAGE CONFIRMATION AND ADJUSTMENT

Note: The following adjustments should always be performed when replacing the following components, which are marked with ◪ on the schematic diagram on the A Board:

A BOARD: ◪ IC604, PH602

1. Using a Variac, apply AC input voltage: 130 + 2.0 / - 0.0 VAC.
2. Input a DOT pattern at Q.C.
3. Set the PICTURE and the BRIGHTNESS controls to minimum.
4. Confirm the voltage of A Board between TP-23 & Ground is =135.6 ± 1VDC.
5. If step 4 is not satisfied, replace the components listed above, then repeat steps 1 throught 3.

FIGURE 1



SECTION 4: CIRCUIT ADJUSTMENTS

Electrical AdjustmenTs by Remote Commander

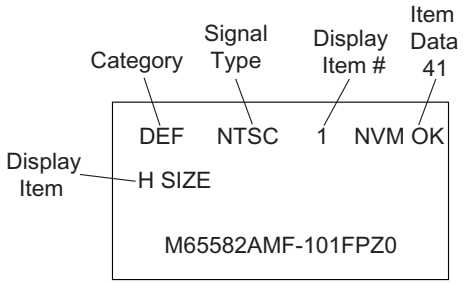
Use the Remote Commander (RM-Y180, RM-Y195) to perform the circuit adjustments in this section.
Test Equipment Required: 1. Pattern generator 2. Frequency counter 3. Digital multimeter 4. Audio oscillator

4-1. SETTING THE SERVICE ADJUSTMENT MODE

1. Standby mode (Power off).
2. Press the following buttons on the remote commander within a second of each other:
   Display ➡ Channel 5 ➡ Sound Volumne + ➡ Power

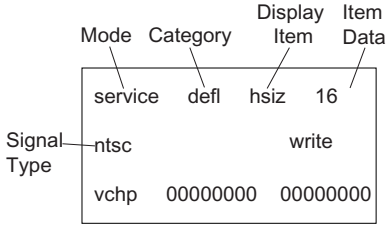
Service Adjustment Mode On

1. The CRT displays the item being adjusted.

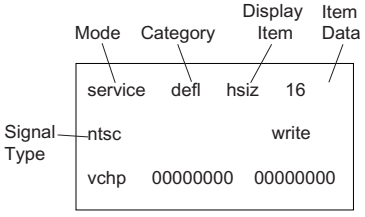


2. Press 1 or 4 on the Remote Commander to select the item.
3. Press 3 or 6 on the Remote Commander to change the data.
4. Press MUTING then ENTER to write into memory.

Service Adjustment Mode Memory



1. Press 8 then ENTER on the Remote Commander to initialize.



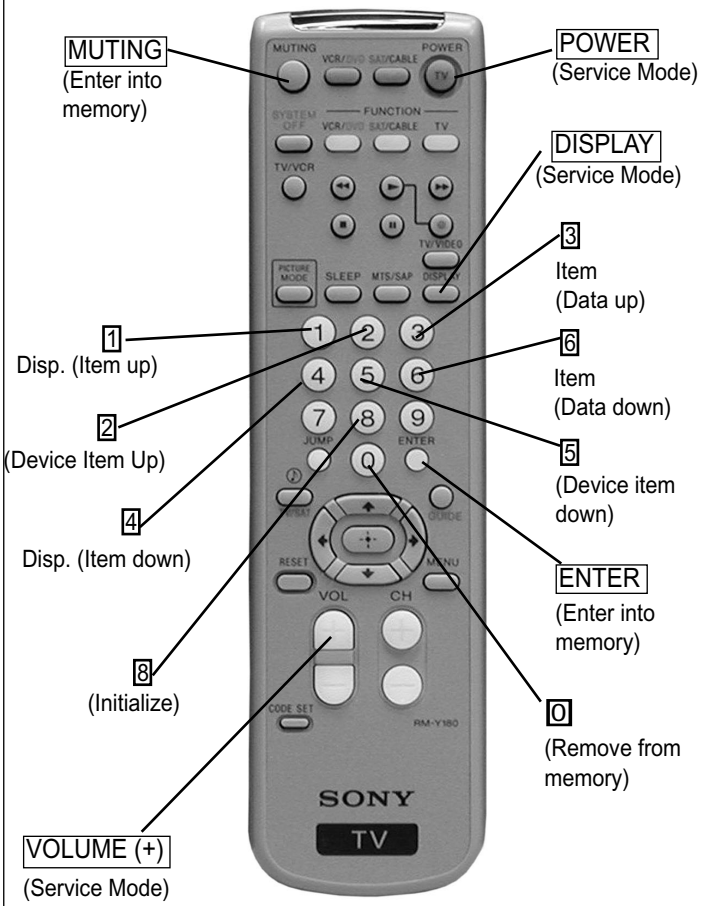
Carry out Step 1 when adjusting IDs 0-7 and when replacing and adjusting IC002

2. Press MUTING then ENTER to write into memory.
3. Turn set off then on to exit Service Adjustment Mode.

4-2. MEMORY WRITE CONFIRMATION METHOD

1. After adjustment, pull out the plug from the AC outlet, then replace the plug in the AC outlet again.
2. Turn the power switch ON and set to Service Mode.
3. Call the adjusted items again to confirm they were adjusted.

4-3. REMOTE ADJUSTMENT BUTTONS AND INDICATORS



RM-Y180

4-5. A BOARD ADJUSTMENTS

H. Frequency (Free Run) Check

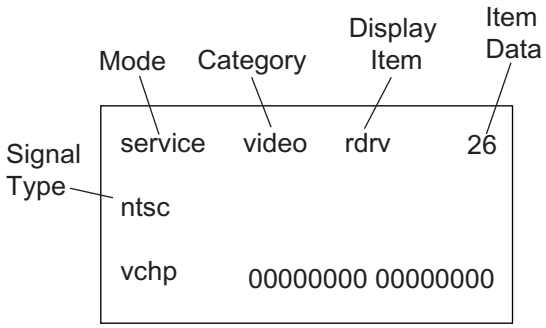
1. Input a TV mode (RF) with no signal.
2. Connect a frequency counter to base of Q502 (TP-25 H. DRIVE) on the A Board.
3. Check H. Frequency for 15735 ± 200 Hz.

V. Frequency (Free Run) Check

1. Select video 1 with no signal input.
2. Set the conditions for a standard setting.
3. Connect the frequency counter to TP-27 (V OUT) or CN515 pin ⑥ (V DY+) and ground on the A Board .
4. Check that V. Frequency shows 60 ± 4 Hz.

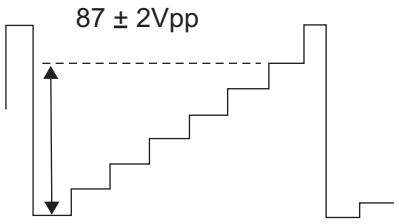
Drive (SCON)

1. Input a color-bar signal and set the level to 75%.
2. Set in Pro mode + PICTURE MAX.
3. Activate the Service Adjustment Mode.
4. Set GON and BON items. Using 3 and 6 set each to the following values. Leave RON set to “1”.



R ON:	ON	(1)
G ON:	OFF	(0)
B ON:	OFF	(0)

5. Connect an oscilloscope probe to CW Board, JW2704 (KR).
6. Select SCON with 1 and 4 .
7. Adjust the value of SCON with 3 and 6 for 87 ± 2Vpp.



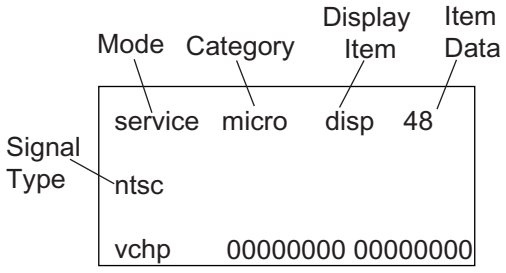
8. Reset GON and BON values to “1”.

R ON:	ON	(1)
G ON:	ON	(1)
B ON:	ON	(1)

9. Press MUTING then ENTER to save into the memory.

Display Position Adjustment (DISP)

1. Input a color-bar signal.
2. Set to Service Adjustment Mode.
3. Select DISP with 1 and 4 .
4. Adjust values of DISP with 3 and 6 to adjust characters to the center.
5. Press MUTING then ENTER to save into the memory.
6. Check to see if the text is displayed on the screen.

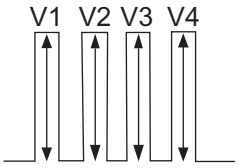


Sub Bright Adjustment (SBRT)

1. Input a monoscope signal.
2. Activate the Service Adjustment Mode.
3. Set the PICTURE and BRIGHTNESS to minimum.
4. Select the SBRT item with 1 and 4 .
5. Adjust the values of SBRT with 3 and 6 to obtain a faintly visible 20 IRE mark, after that increase +3 steps.
6. Press MUTING then ENTER to save into the memory.

Sub Hue, Sub Color Adjustment (SHUE, SCOL)

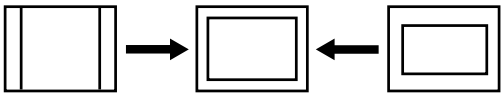
1. Input color-bar signal at 75%.
2. Activate the Service Adjustment Mode.
3. Set (PIC) to Max and (COL) to 50%.
4. Connect an oscilloscope probe to CW Board, JW7408 (Blue Out).
5. Select the SHUE and SCOL item with 1 and 4 .
6. While showing the SHUE item, adjust the waveform with 3 and 6 until the second and third bars show the same level (V2 = V3 < 0.15Vp-p). Set Sub Hue -2 Step.
7. While showing the SCOL item, adjust the waveform with 3 and 6 until the first and fourth bars show the same level (V1 = V4 < 0.15Vp-p). Set Sub Col + 2 Step.



8. Press MUTING then ENTER to save into the memory.

V. Size Adjustment (VSIZ)

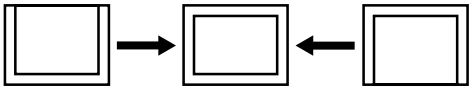
1. Input a crosshatch signal.
2. Activate the Service Adjustment Mode.
3. Select the VSIZ item with 1 and 4.
4. Adjust value of VSIZ with 3 and 6 for the best vertical size.
5. Press MUTING then ENTER to save into the memory.



V. Center Adjustment (VPOS)

Perform this adjustment after performing H. Frequency (Free Run) Check.

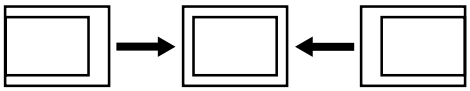
1. Input a crosshatch signal.
2. Activate the Service Adjustment Mode.
3. Select the VPOS item with 1 and 4 .
4. Adjust value of VPOS with 3 and 6 for the best vertical center.
5. Press MUTING then ENTER to save into the memory.



H. Center Adjustment (HPOS)

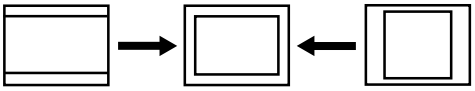
Perform this adjustment after performing H. Frequency (Free Run) Check.

1. Input a crosshatch signal.
2. Activate the Service Adjustment Mode.
3. Select the HPOS item with 1 and 4 .
4. Adjust the value of HPOS with 3 and 6 for the best horizontal center.
5. Press MUTING then ENTER to save into the memory.



H. Size Adjustment (HSIZ)

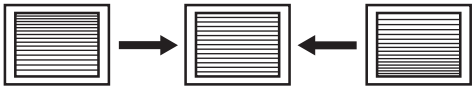
1. Input a monoscope signal.
2. Activate the Service Adjustment Mode.
3. Select HSIZ with 1 and 4 .
4. Adjust with 3 and 6 for the best horizontal size.
5. Press MUTING then ENTER to save into the memory.



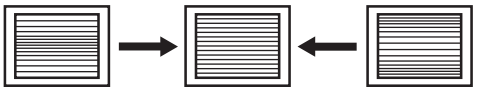
V. Linearity (VLIN), V. Correction (SCOR), PIN Amp (PAMP), and Horizontal Trapezoid (HTRP) Adjustments

1. Input a crosshatch signal.
2. Activate the Service Adjustment Mode.
3. Select VLIN, SCOR, PAMP, and HTRP with with 1 and 4.
4. Adjust with 3 and 6 for the best horizontal size.
5. Press MUTING then ENTER to save into the memory.

V LINEARITY (VLIN)

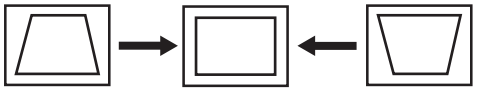


V CORRECTION (SCOR)



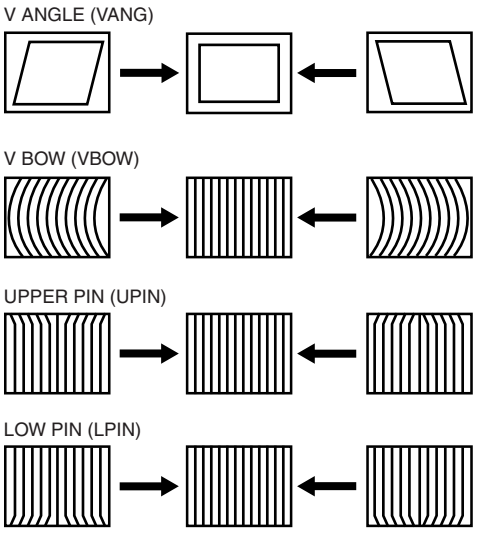
PIN AMP (PAMP)

HORIZONTAL TRAPEZOID (HTRP)



V. Angle (VANG), V. Bow (VBOW), Upper PIN (UPIN) and Low PIN (LPIN) Adjustments

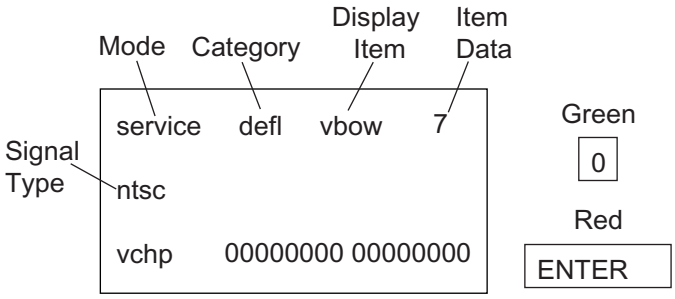
1. Input a crosshatch signal.
2. Activate the Service Adjustment Mode.
3. Select VANG, VBOW, UPIN, and LPIN with 1 and 4.
4. Adjust with 3 and 6 for the best picture.
5. Press MUTING then ENTER to save into the memory.



Service Adjustment Mode Memory

1. After completing all adjustments, press 0 then ENTER .

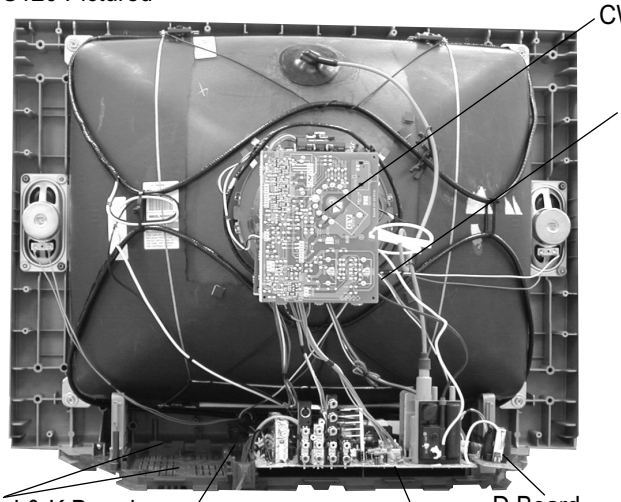
Read From Memory



SECTION 5: DIAGRAMS

5-1. CIRCUIT BOARDS LOCATION

KV-27FS120 Pictured



The components identified by shading and ⚠ symbol are critical for safety. Replace only with part number specified.

The symbol ▬ indicates a fast operating fuse and is displayed on the component side of the board. Replace only with fuse of the same rating as marked.

Les composants identifies per un trame et une marque ⚠ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

Le symbole ▬ indique une fusible a action rapide. Doit etre remplace par une fusible de meme yaleur, comme maque.

The components identified by ⋈ in this basic schematic diagram have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be necessary, replace only with the value originally used.

5-2. PRINTED WIRING BOARD AND SCHEMATIC DIAGRAM INFORMATION

All capacitors are in µF unless otherwise noted. pF : µµF 50WV or less are not indicated except for electrolytics and tantalums.

All electrolytics are in 50V unless otherwise specified.

All resistors are in ohms. k=1000, M=1000k

Indication of resistance, which does not have one for rating electrical power, is as follows: Pitch : 5mm Rating electrical power :

$^1/_4$ W in resistance, $^1/_{10}$ W and $^1/_8$ W in chip resistance.

: nonflammable resistor.

: fusible resistor.

△ : internal component.

▭ : panel designation and adjustment for repair.

⊥ : earth ground

⏚ : earth-chassis

All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

Readings are taken with a color-bar signal input.

Readings are taken with a 10M digital multimeter.

Voltages are DC with respect to ground unless otherwise noted.

Voltage variations may be noted due to normal production tolerances.

All voltages are in V.

S : Measurement impossibillity.

: B-line. (Actual measured value may be different).

: signal path. (RF)

Circled numbers are waveform references.

When replacing components identified by ◪, make the necessary adjustments as indicated. If the results do not meet the specified value, change the component identified by ⋈ and repeat the adjustment until the specified value is achieved.
(Refer to Section 3: Safety Related Adjustments on Page 17.)

When replacing the parts listed in the table below, it is important to perform the related adjustments.

Part Replaced (◪)	Adjustment (⋈)

SECTION 6: EXPLODED VIEWS

Components not identified by a part number or description are not stocked because they are seldom required for routine service.

The component parts of an assembly are indicated by the reference numbers in the far right column of the parts list and within the dotted lines of the diagram.

* Items marked with an asterisk are not stocked since they are seldom required for routine service. Expect some delay when ordering these components.

NOTE: The components identified by shading and ⚠ mark are critical for safety. Replace only with part number specified.

NOTE: Les composants identifies per un trame et une marque ⚠ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

SECTION 7: ELECTRICAL PARTS LIST

NOTE: The components identified by shading and ⚠ mark are critical for safety. Replace only with part number specified.

NOTE: Les composants identifies per un trame et une marque ⚠ sont critiques pour la securite. Ne les remplacer que par une piece portant le numero specifie.

The components in this manual identified by the following symbol: ⋈ indicate parts that have been carefully factory-selected to satisfy regulations regarding X-ray radiation for each set.

Should replacement be required for one of these components, replace only with the value originally used.

*** Items marked with an asterisk are not stocked since they are seldom required for routine service. Expect some delay when ordering these components.**

RESISTORS
- **All resistors are in ohms**
- **F : nonflammable**
- **All variable and adjustable resistors have characteristic curve B, unless otherwise noted.**

When ordering parts by reference number, please include the board name.

NOTE: The components identified by shading and ⚠ mark are critical for safety. Replace only with part number specified.

A component identified by this ⋈ symbol indicates that it has been carefully factory-selected to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.

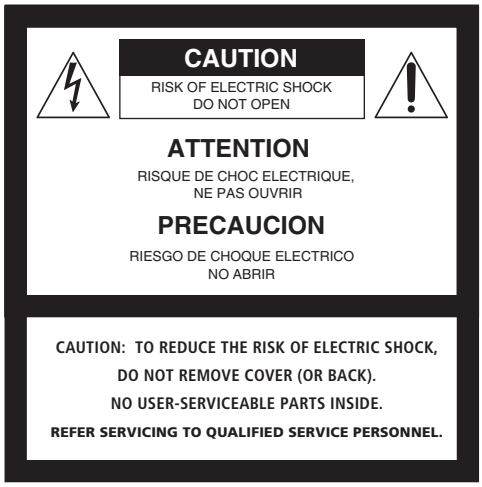
Operating Instructions

KV-27FS120

WARNING

To reduce the risk of fire or electric shock, do not expose the TV to rain or moisture.



This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Note to the CATV Installer

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building as close to the point of cable entry as practical.

SAFETY PRECAUTIONS

- ❏ Operate the TV only on 120 V AC.
- ❏ One blade of the power plug is wider than the other for safety purposes and will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
- ❏ If any liquid or solid object falls into the TV, unplug it and have it checked by qualified personnel before operating it further.

CAUTION

When using TV games, computers, and similar products with your TV, keep the brightness and contrast functions at low settings. If a fixed (non-moving) pattern is left on the screen for long periods of time at a high brightness or contrast setting, the image can be permanently imprinted onto the screen. Continuously watching the same channel can cause the imprint of station logos onto the TV screen. These types of imprints are not covered by your warranty because they are the results of misuse.

To reduce the risk of electric shock, do not use this polarized plug with an extension cord, receptacle, or other outlet unless the blades can be fully inserted to prevent blade exposure.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

NOTIFICATION

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ❏ Reorient or relocate the receiving antennas.
- ❏ Increase the separation between the equipment and receiver.
- ❏ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ❏ Consult the dealer or an experienced radio/TV technician for help.

Protecting the TV

- ❏ To prevent internal heat build-up, do not block the ventilation openings.
- ❏ Do not install the TV in a hot or humid place, or in a place subject to excessive dust or mechanical vibration.

Note on Caption Vision

This television receiver provides display of television closed captioning in accordance with § 15.119 of the FCC rules. Use of this television for other than private viewing of programs broadcast on UHF or VHF or transmitted by cable companies for the use of the general public may require authorization from the broadcaster-cable company and/or program owner.

Owner's Record

The model and serial numbers are located on the front cover of this manual and at the rear of your TV.

Trademarks and Copyrights

ENERGY STAR is a registered mark.

As an ENERGY STAR Partner, Sony has determined that this product or product model meets the ENERGY STAR® guidelines for energy efficiency.

WEGA, FD Trinitron, ClearEdge VM, Intelligent Picture, Steady Sound and Caption Vision are registered trademarks of Sony Corporation.

IMPORTANT SAFEGUARDS

For your protection, please read these instructions completely, and keep this manual for future reference. Carefully observe and comply with all warnings, cautions and instructions placed on the set, or described in the operating instructions or service manual.

WARNING

To guard against injury, the following basic safety precautions should be observed in the installation, use, and servicing of the set.

Use

Power Sources

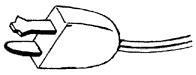
This set should be operated only from the type of power source indicated on the serial/model plate. If you are not sure of the type of electrical power supplied to your home, consult your dealer or local power company. For those sets designed to operate from battery power, refer to the operating instructions.

Grounding or Polarization

This set may be equipped with a polarized alternating current line plug (a plug having one blade wider than other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

For the set with a polarized AC power cord plug

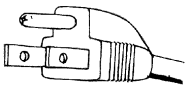
This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the polarized plug by forcing it in.



Alternate Warning

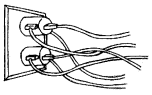
For the set with a three-wire grounding type AC plug

This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the grounding plug.



Overloading

Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.



Always turn the set off when it is not to be used. When the set is left unattended and unused for long periods of time, unplug it from the wall outlet as a precaution against the possibility of an internal malfunction that could create a fire hazard.

Do not disconnect the antenna or the power cord during a heavy storm. Lightning may strike while you are holding the cable or cord, causing serious injury. Turn off your TV and wait for the weather to improve.

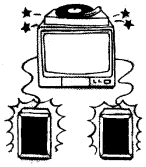
Object and Liquid Entry

Never push objects of any kind into the set through the cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

Attachments

Do not use attachments not recommended by the manufacturer, as they may cause hazards.

Do not place any objects, especially heavy objects, on top of the set. The object may fall from the set, causing injury.



Cleaning

Unplug the set from the wall outlet before cleaning or polishing it. Do not use liquid cleaners or aerosol cleaners. Use a cloth lightly dampened with water for cleaning the exterior of the set.

If a snapping or popping sound from a TV set is continuous or frequent while the TV is operating, unplug the TV and consult your dealer or service technician. It is normal for some TV sets to make occasional snapping or popping sounds, particularly when being turned on or off.

Installation

Always use two or more people to lift or move the set. The set is heavy and the bottom surface is flat. Serious injury can result from trying to move the set by yourself alone, or from unsteady handling.

Install the set on a stable, level surface.

Water and Moisture

Do not use power-line operated sets near water — for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

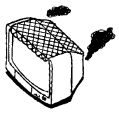
Accessories

Do not place the set on an unstable cart, stand, tripod, bracket, table, or shelf. The set may fall, causing serious injury to a child or an adult, and serious damage to the set. Use only a cart or stand recommended by the manufacturer for the specific model of TV. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

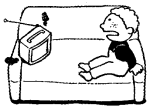
Ventilation

The slots and openings in the cabinet and in the back or bottom are provided for necessary ventilation. To ensure reliable operation of the set, and to protect it from overheating, these slots and openings must never be blocked or covered.

- **Never cover the slots and openings with a cloth or other materials.**



- **Never block the slots and openings by placing the set on a bed, sofa, rug or other similar surface.**



- **Never place the set in a confined space, such as a bookcase or built-in cabinet, unless proper ventilation is provided.**

- **Do not place the set near or over a radiator or heat register, or where it is exposed to direct sunlight.**

Power-Cord Protection

Do not allow anything to rest on or roll over the power cord, and do not place the set where the power cord is subject to wear or abuse.

Antennas

Outdoor Antenna Grounding

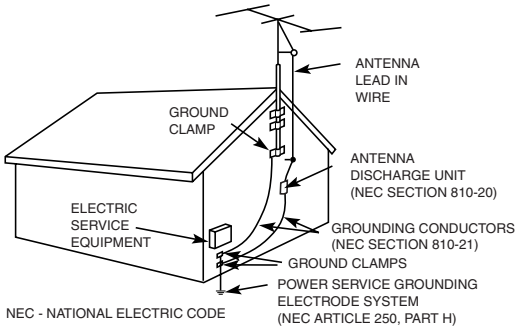
If an outdoor antenna is installed, follow the precautions below. An outdoor antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can come in contact with such power lines or circuits.

WHEN INSTALLING AN OUTDOOR ANTENNA SYSTEM, EXTREME CARE SHOULD BE TAKEN TO KEEP FROM CONTACTING SUCH POWER LINES OR CIRCUITS AS CONTACT WITH THEM IS ALMOST INVARIABLY FATAL.

Be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code (NEC) in USA and Section 54 of the Canadian Electrical Code in Canada provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

Antenna Grounding According to the NEC

Antenna Grounding According to the National Electrical Code, ANSI/NFPA 70.



Lightning

For added protection for this television receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the receiver due to lightning and power-line surges.

Service

Damage Requiring Service

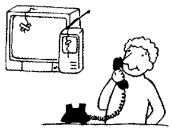
Unplug the set from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- **When the power cord or plug is damaged or frayed.**

- **If liquid has been spilled into the set or objects have fallen into the product.**

- **If the set has been exposed to rain or water.**

- **If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged.**



- **If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the set to normal operation.**

- **When the set exhibits a distinct change in performance — this indicates a need for service.**

Servicing

Do not attempt to service the set yourself since opening the cabinet may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Replacement Parts

When replacement parts are required, be sure the service technician certifies in writing that he has used replacement parts specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.

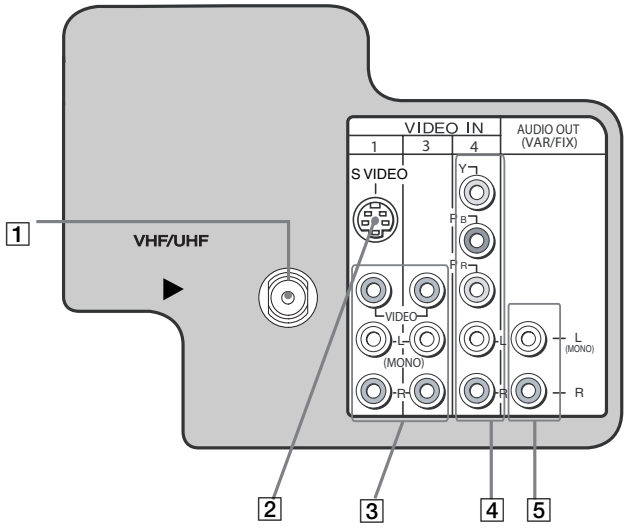
Safety Check

Upon completion of any service or repairs to the set, ask the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition, and to so certify. When the set reaches the end of its useful life, improper disposal could result in a picture tube implosion. Ask a qualified service technician to dispose of the set.

Connecting Your TV

Read this section before setting up your TV for the first time. This section explains how to make the basic connections and how to connect optional equipment.

TV Rear Panel



Jack	Description
1 **VHF/UHF**	This input connects to your VHF/UHF antenna or cable.
2 **S VIDEO**	This input connects to the S VIDEO OUT jack on your VCR or other video equipment that has S VIDEO. S VIDEO provides better picture quality than the VHF/UHF jacks or the video input jack. S VIDEO does not provide sound, so you still must connect the audio cables.
3 **VIDEO/AUDIO L(MONO), R**	This input connects to the AUDIO/VIDEO output jacks on your VCR or other video equipment. A third video input jack (VIDEO 2) is located on the front panel of the TV. These AUDIO/VIDEO input jacks provide better picture quality than the VHF/UHF jack.

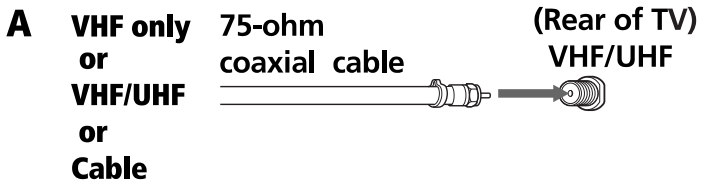
4 **Y, P_B, P_R/ L, R**	This input connects to the component video Y, P_B, P_R, and AUDIO L, R jacks on your DVD player or digital set-top box (480i only).
5 **AUDIO OUT (VAR/FIX) L(MONO), R**	This jack connects to the Audio input jacks on your audio equipment. You can listen to your TV's audio through your stereo system.

Basic Connections

TV with Cable, Indoor, or Outdoor Antenna

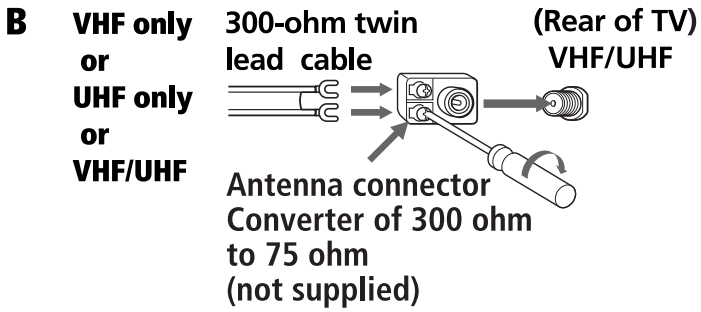
Depending on the cable system available in your home, choose one of the connections below:

A



Use this to connect the TV to a cable system or an antenna with a 75-ohm cable (usually built into newer homes).

B



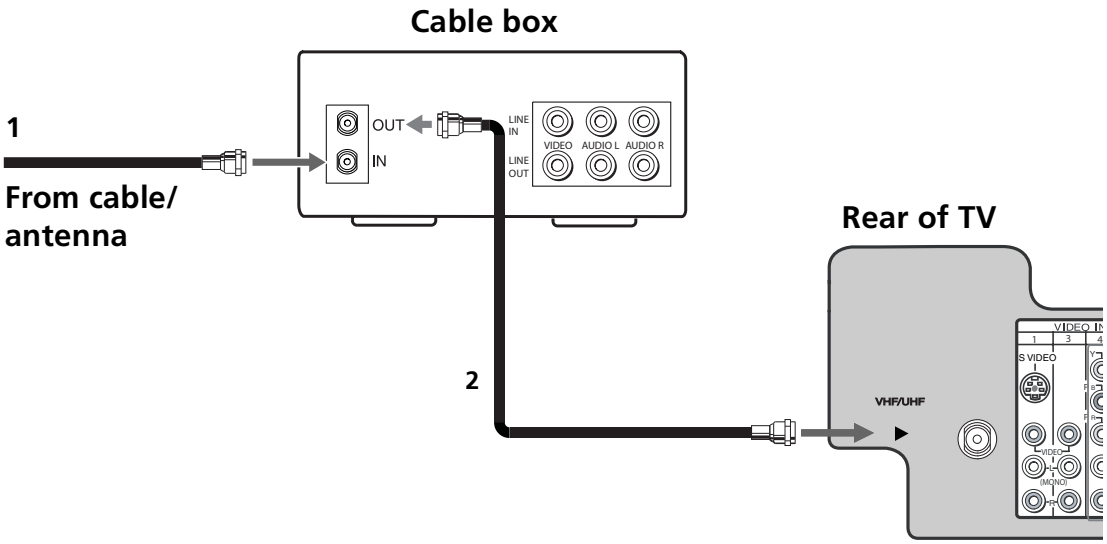
Use this to connect the TV to a dipole antenna, also known as a “rabbit ears” antenna (usually found in older homes).

✍ If you are connecting to an indoor or outdoor antenna, you may need to adjust the orientation of the antenna for the best reception.

Cable Box Connections

Some cable TV systems use scrambled or encoded signals that require a cable box to view all channels. If you subscribe to that kind of cable service, use this connection.

TV and Cable Box



1 Connect the coaxial cable from your cable service to the IN jack on your cable box.

2 Connect a coaxial cable (not supplied) from the OUT jack on your cable box to the VHF/UHF jack on your TV.

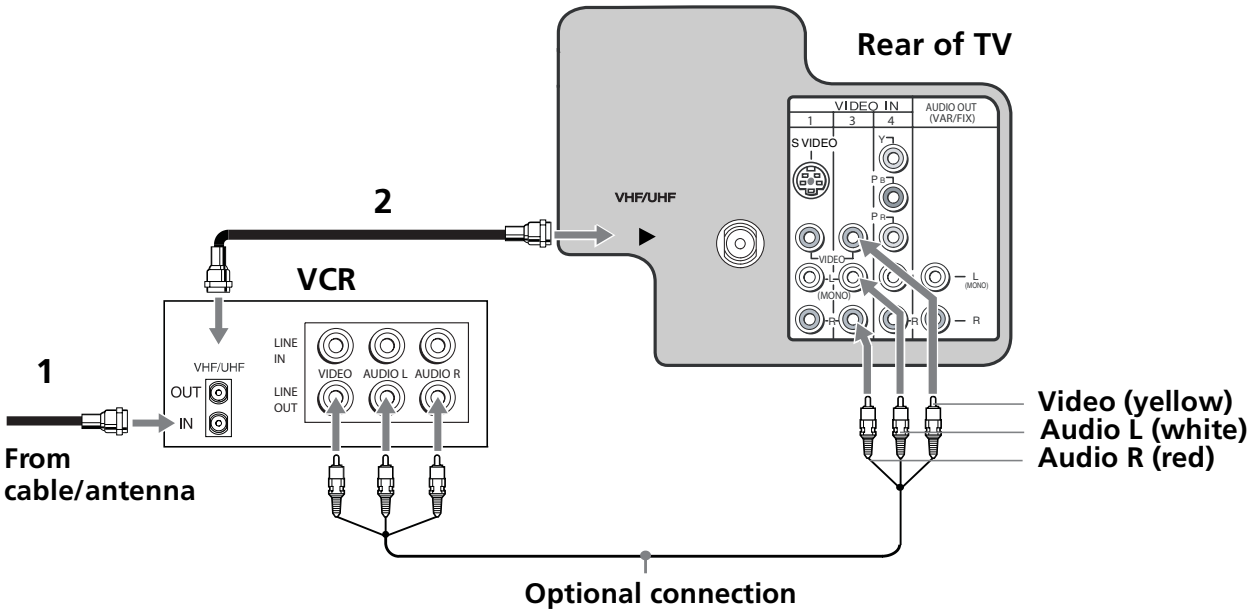
Using your TV with this connection

This connection allows you to do the following:

- ❏ Program your Sony remote control to operate your cable box (see page 5).
- ❏ To activate your remote press SAT/CABLE (FUNCTION button) to operate your cable box and then use the ⓪-⑨ buttons or CH+/- buttons to change the channels. To do this, first program your remote control, then use the Channel Fix feature to set your TV to channel 3 or 4 (see page 31).

Connecting Additional Equipment

Connecting a TV and VCR



1 Connect the coaxial cable from your TV antenna or cable service to the IN jack on your VCR.

2 Connect a coaxial cable (not supplied) from the OUT jack on your VCR to the VHF/UHF jack on the TV.

Optional connection

- ❏ If your VCR is equipped with video outputs, you can get better picture quality by connecting audio/video cables (not supplied) from AUDIO/VIDEO OUT on your VCR to AUDIO/VIDEO IN on your TV.
- ❏ For better picture quality, use S VIDEO instead of the yellow video cable. S VIDEO does not provide sound, so you still must connect the audio cables.

Using your TV with this connection

This connection allows you to do the following:

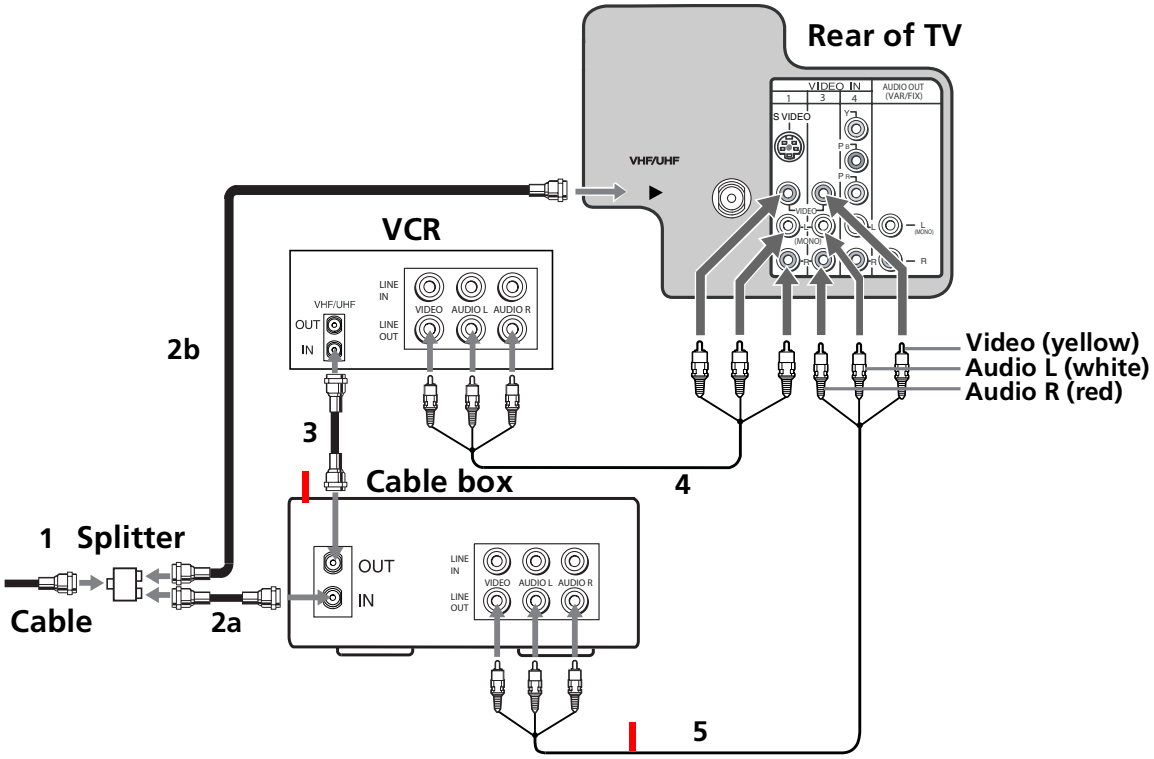
- ❏ Program your Sony remote control to operate your VCR (see page 5).
- ❏ To activate your remote, press VCR/DVD (FUNCTION button) to operate your VCR. To do this, first program your remote control, then use the Channel Fix feature to set your TV to channel 3 or 4 (see page 31).
- ❏ Press TV/VIDEO repeatedly to switch between VCR input (VIDEO input) and VHF/UHF (local channels).

Connecting a TV, VCR, and Cable Box

DIGITAL CABLE BOX USERS: If you are connecting a digital cable box, you will need a special bi-directional splitter (5-900 Mhz mininum) that is designed to work with your digital cable box.

Use this connection if you subscribe to a cable system that scrambles some channels (pay channels), but not all of them. This setup allows you to:

- change channels through your cable box or VCR when you are receiving a scrambled signal
- change channels through your TV



1 Connect the single input jack of the splitter (not supplied) to your incoming cable connection.

2 Using coaxial cables (not supplied), connect the two output jacks of the splitter (not supplied) to:

   a) the IN jack on your cable box

   b) the VHF/UHF jack on the TV

3 Using a coaxial cable (not supplied), connect the OUT jack on your cable box to the IN jack on your VCR.

4 Using the audio/video cables (not supplied), connect the AUDIO VIDEO OUT on your VCR to the AUDIO/VIDEO IN on your TV.

5 Using the audio/video cables (not supplied), connect the AUDIO VIDEO OUT on your cable box to the AUDIO/VIDEO IN on your TV.

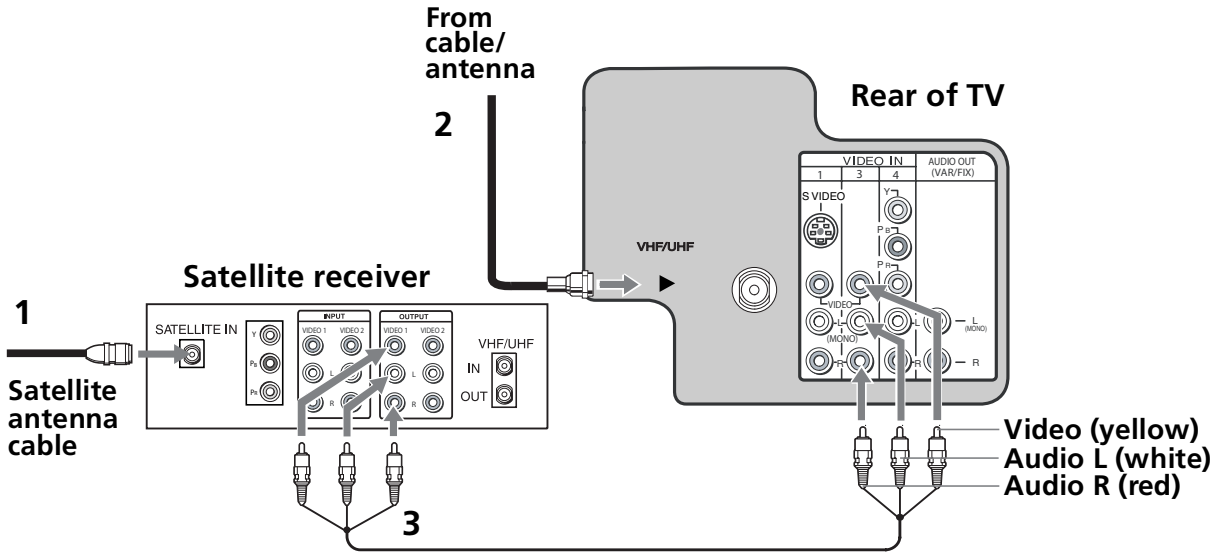
Optional connection

- For better picture quality, use S VIDEO instead of the yellow video cable. S VIDEO does not provide sound, so you still must connect the audio cables.

Using your TV with this connection

- Program your Sony remote control to operate your VCR or cable box (see page 5).
- To activate your remote, press VCR/DVD (FUNCTION button) to operate your VCR or SAT/CABLE (FUNCTION button) to operate your cable box. To do this, first program your remote control, then use the Channel Fix feature to set your TV to channel 3 or 4 (see page 31).
- Press TV/VIDEO repeatedly to switch between VCR input (VIDEO input), VHF/UHF (local channels or unscrambled), or cable box (cable system or scrambled channels).

Connecting a TV and Satellite Receiver



1 Connect the cable from your satellite antenna to SATELLITE IN on your satellite receiver.

2 Connect the coaxial cable from your cable service or antenna to the VHF/UHF jack on your TV.

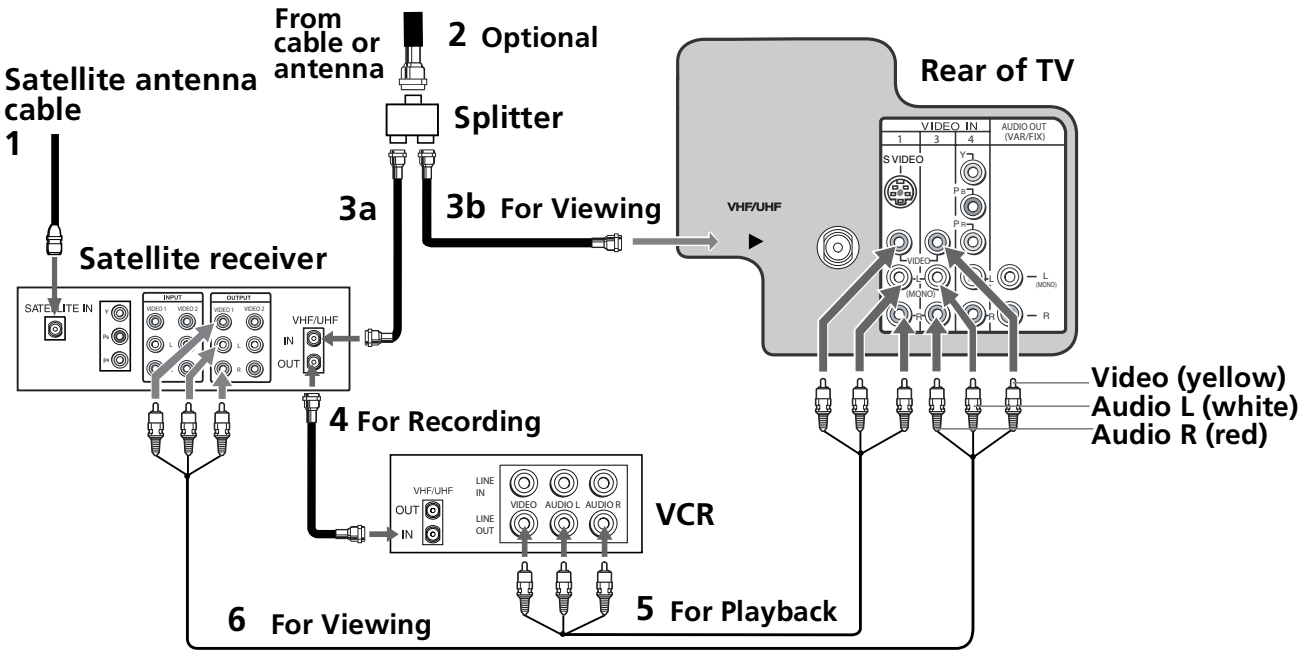
3 Using audio/video cables (not supplied), connect AUDIO/VIDEO OUT on your satellite receiver to AUDIO/VIDEO IN on your TV.

Using your TV with this connection

This connection allows you to do the following:

- ❏ Program your Sony remote control to operate your satellite receiver (see page 5).
- ❏ To activate your remote, press SAT/CABLE (FUNCTION button) to operate your satellite receiver. See page 7 on how to operate other functions.
- ❏ Press TV/VIDEO repeatedly to switch to satellite receiver input (VIDEO input).

Connecting a TV, VCR, Cable/Antenna, and Satellite Receiver using Composite Video (VIDEO/AUDIO L(MONO), R)



1 Connect the cable from your satellite antenna to SATELLITE IN on your satellite receiver.

2 Connect the single input jack of the splitter (not supplied) to your incoming cable/antenna (optional connection to view local channels or broadcast).

3 Using coaxial cables (not supplied), connect the two output jacks of the splitter (not supplied) to:

a) the IN jack on your satellite receiver

b) the VHF/UHF jack on the TV

4 Using a coaxial cable (not supplied), connect the OUT jack on your satellite receiver to the VHF/UHF IN on your VCR.

5 Using audio/video cables (not supplied), connect AUDIO/VIDEO OUT on your VCR to the AUDIO/VIDEO IN on your TV.

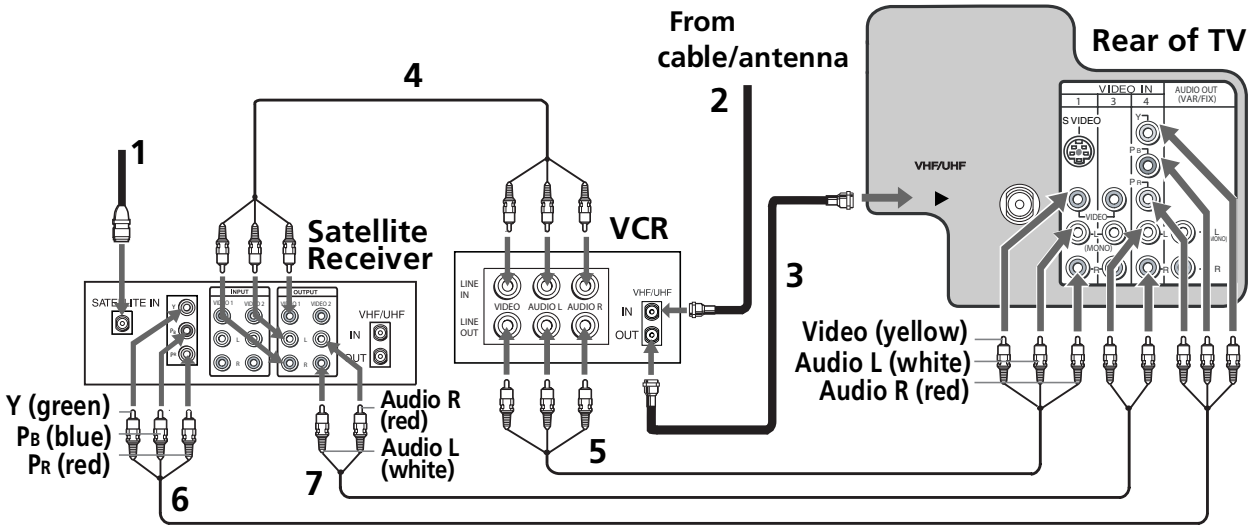
6 Using audio/video cables (not supplied), connect the AUDIO/VIDEO OUT on your satellite receiver to the AUDIO/VIDEO IN on your TV.

Using your TV with this connection

This connection allows you to do the following:

- ❏ Program your Sony remote control to operate your VCR or satellite receiver (see page 5).
- ❏ To activate your remote, press VCR/DVD (FUNCTION button) to operate your VCR or SAT/CABLE (FUNCTION button) to operate your satellite receiver.
- ❏ Press TV/VIDEO repeatedly to switch between VCR input (VIDEO input), VHF/UHF (local channels or unscrambled), or your cable box (cable system or scrambled channels).

Connecting a TV, VCR, and Satellite Receiver using Component Video (Y, P_B, P_R)



1 Connect the coaxial cable from your satellite antenna to SATELLITE IN on the satellite receiver.

2 Connect the coaxial cable from your cable service or antenna to the IN jack on your VCR.

3 Using a coaxial cables (not supplied), connect the OUT jack on your VCR to the VHF/UHF jack on your TV.

4 Using audio/video cables (not supplied), connect AUDIO/VIDEO OUT on your satellite receiver to AUDIO/VIDEO IN on your VCR.

5 Using audio/video cables (not supplied), connect the AUDIO/VIDEO OUT on your VCR to AUDIO/VIDEO IN on your TV.

6 Using component video cables (not supplied), connect the Y, P_B, P_R OUT on your satellite receiver to Y, P_B, P_R IN on your TV.

7 Connect AUDIO OUT on your satellite receiver to AUDIO IN on your TV.

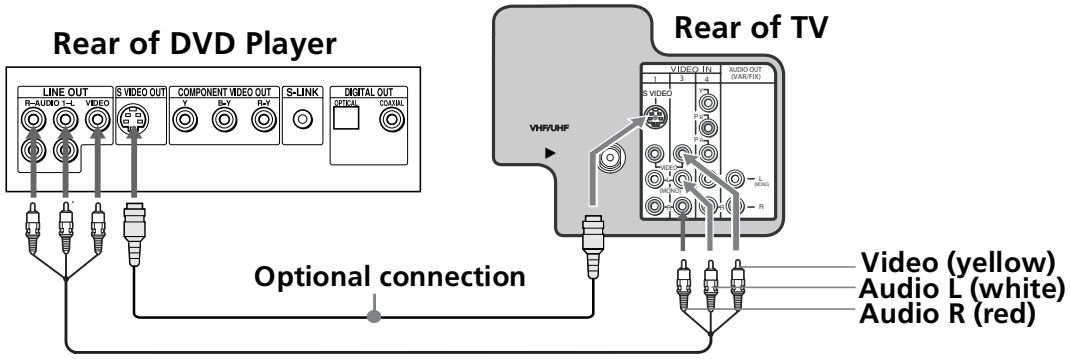
Using your TV with this connection

This connection allows you to do the following:

- ❏ Program your Sony remote control to operate your VCR or satellite receiver (see page 5).
- ❏ Turn on your VCR to enable your satellite receiver to work with this connection.
- ❏ To activate your remote, press VCR/DVD (FUNCTION button) to operate your VCR or SAT/CABLE (FUNCTION button) to operate your satellite receiver.
- ❏ Press TV/VIDEO repeatedly to switch between VCR input (VIDEO input), VHF/UHF (local channels or unscrambled), or your cable box (cable system or scrambled channels).

Connecting a DVD Player using Composite Video (VIDEO/AUDIO L(MONO),R)

Using audio/video cables (not supplied), connect AUDIO/VIDEO OUT on your DVD player to AUDIO/VIDEO IN on your TV.

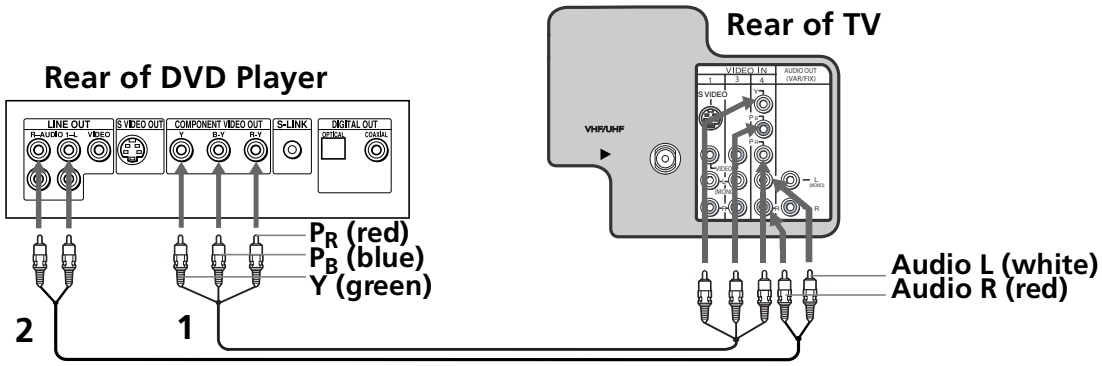


Optional connection

❏ For better picture quality, use S VIDEO instead of the yellow video cable. S VIDEO does not provide sound, so you still must connect the audio cables.

Connecting a DVD Player using Component Video (Y, P_B, P_R/R, L)

If your DVD player is equipped with component video outputs (Y, P_B, P_R), you can improve the picture quality by using component video cables (480i only).



1 Using component video cables (not supplied), connect the Y, P_B, P_R OUT on your DVD player to Y, P_B, P_R IN on your TV.

2 Connect AUDIO OUT on your DVD player to AUDIO IN on your TV.

✍ The Y, P_B, P_R outputs on your DVD player are sometimes labeled Y, C_B, and C_R or Y, B-Y, and R-Y. If so, connect the cables to like colors.

Using your TV with this connection

This connection allows you to do the following:

❏ Program your Sony remote control to operate your DVD (see page 5).

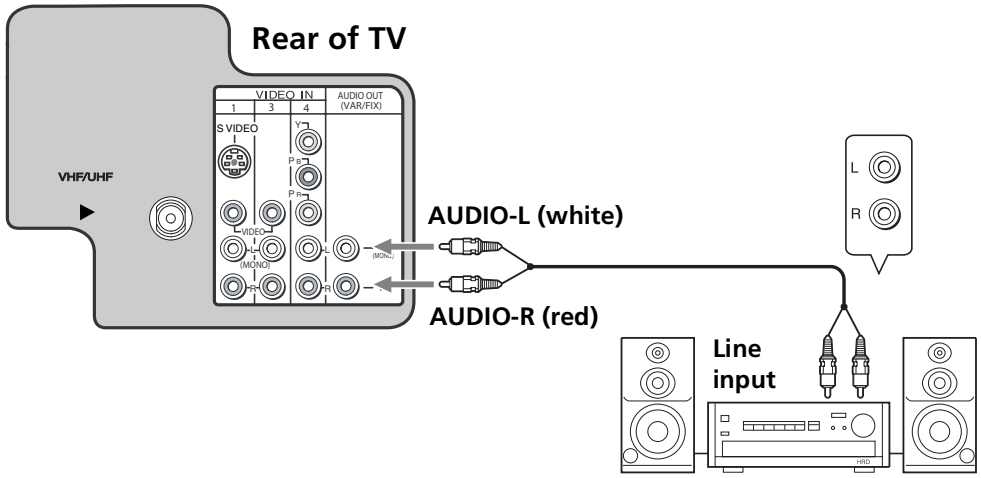
❏ To activate your remote, press VCR/DVD (FUNCTION button) to operate your DVD.

❏ Press TV/VIDEO repeatedly to switch to the DVD player's input (VIDEO input).

Connecting an Audio System

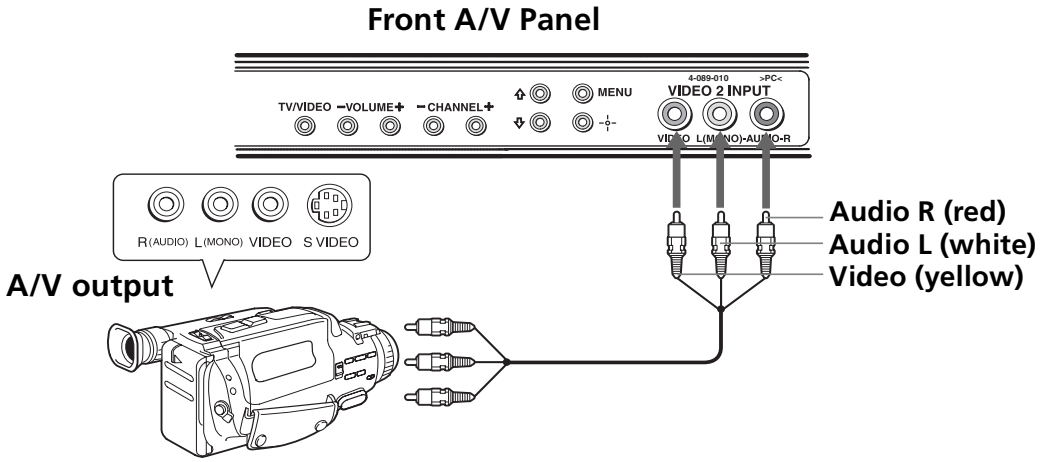
If you are connecting a Home Theater, please refer to your Home Theater manual for additional connections.

1. Using audio/video cables (not supplied), connect AUDIO OUT on your TV to one of the unused line inputs (e.g. TV, AUX, TAPE2) on your stereo.
2. Set the Speaker option to Off. For more instructions, see "Using the Audio Menu" on page 29.
3. Open the Audio Out option on the Audio Menu and select Fixed to control the volume through the connected audio system. For more instructions, see "Using the Audio Menu" on page 29.

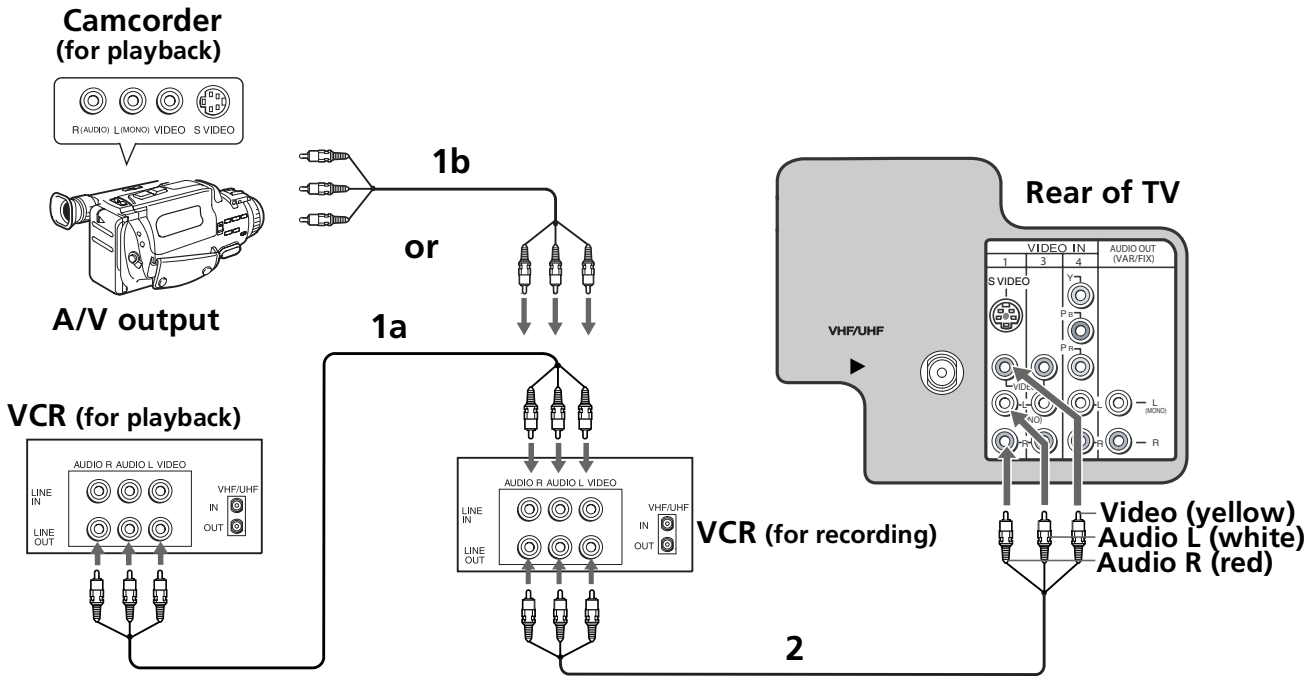


Connecting a Camcorder (for playback)

To connect your camcorder, you can use the Audio/Video inputs on either the front or rear panel of the TV. Using the audio/video cables (not supplied), connect the AUDIO/VIDEO OUT on your camcorder to the AUDIO/VIDEO IN on your TV.



Connecting for Video Tape Editing (VCR and Camcorder)



1 For video tape editing connect to the VCR the following sources (VCR or Camcorder):

a) Using audio/video cables (not supplied), connect AUDIO/VIDEO OUT on your first VCR to AUDIO/VIDEO IN on your second VCR

b) Using audio/video cables (not supplied), connect the AUDIO/VIDEO OUT on your Camcorder to the AUDIO/VIDEO IN on your second VCR

2 Using audio/video cables (not supplied), connect AUDIO/VIDEO OUT on the second VCR to the AUDIO/VIDEO IN on your TV.

Using your TV with this connection

This connection allows you to do the following:

- ❏ Program your Sony remote control to operate your VCR (see page 5).
- ❏ To activate your remote, press VCR/DVD (FUNCTION button) to operate your VCR, see page 7 on how to operate other functions.

Other Information

Troubleshooting

If you have a problem with your TV, try the suggestions below. If the problem persists, see "Contacting Sony" at the end of this section.

General

Problem	Possible Remedies
I want to reset the TV to the factory settings	❑ Turn on the TV. While holding down the RESET button on the remote control, press POWER button on the TV front panel. The TV will turn itself off, then back on again. Release the RESET button.
The TV is dirty	❑ Clean the TV with a soft dry cloth. Never use strong solvents such as thinner or benzine, which might damage the finish of the cabinet.
I lost the parental control password	❑ In the password screen, enter the following master password: 4357. After using the master password, you must create a new password. You cannot use the master to unlock currently blocked channels.
There is a black box on the screen	❑ You have selected a text option in the Setup menu (page 40) and no text is available. To turn off this feature, select Off in the Caption Vision option. If you were trying to select closed captioning, select CC1-4 instead of Text1-4.
There was a blackout or power outage, and now the TV won't turn on and the timer LED is flashing	❑ Press the POWER button on your remote control or on the TV front panel.
Digital cable box does not work	❑ Be sure that you have not connected the digital cable box to the TV's TO CONVERTER jack. This jack is not compatible with digital cable boxes. ❑ If you are connecting a VCR and digital cable box using a splitter, as described in page 14, you must use a special bi-directional splitter (5~900MHz minimum) that is designed to work with your digital cable box.

Remote Control

Problem	Possible Remedies
I cannot operate the remote control	❏ Press TV (FUNCTION) when operating your TV. ❏ Check the orientation of the batteries. ❏ Batteries could be weak. Replace them (page 2). ❏ Move the TV three to four feet away from fluorescent lights.
I cannot change channels with the remote control	❏ Make sure you have not inadvertently switched your TV from the channel 3 or 4 setting if you are using another device to change channels. ❏ If you are using another device to control channels, be sure that you have pressed the FUNCTION button for that device. For example, if you are using your VCR to control channels, be sure to press the VCR/DVD FUNCTION button (page 4).
I lost the remote control	❏ You can use the front panel controls to access your menus, change channels, adjust the volume, or change video inputs (page 2). Contact your nearest Sony Dealer to order a replacement, please call our Sony Direct Accessory and Part Center at 1-800-488-7669 (U.S. residents only).

Programming the Remote Control

Problem	Possible Remedies
More than one code is listed	❏ Try entering them one by one until you come to the correct code for your component.
I entered the wrong code number	❏ If you enter a new code number, the code number you previously entered at that setting is erased.
I cannot operate a component with the remote control	❏ Use the component's own remote control.
When I changed the batteries, the code numbers changed back to the factory settings	❏ You must reprogram the remote control (page 5).

Video

Problem	Possible Remedies
No picture, no sound	❏ Make sure the power cord is plugged in. ❏ If a red light is flashing on the front of your TV for more than a few minutes, disconnect and reconnect the power cord. If the problem continues, call your local service center. ❏ Check the TV/VIDEO setting: when watching TV, set it to TV; when watching video equipment, set it to VIDEO 1, 2, 3 or 4 (page 4). ❏ Try another channel to rule out station trouble.
Poor or no picture, good sound	❏ Adjust the **Picture** setting in the Video menu (page 28). ❏ Adjust the **Brightness** setting in the Video menu (page 28). ❏ Check the antenna and/or cable connections (page 11).
No color	❏ Adjust the **Color** setting in the Video menu (page 28).
Only snow appears on the screen	❏ Check the **Cable** setting in the Channel menu (page 31). ❏ Check the antenna and/or cable connections (page 11). ❏ Make sure the channel selected is currently broadcasting.
Dotted lines or stripes	❏ Adjust the antenna. ❏ Move the TV away from other electronic equipment. Some electronic equipment creates electrical noise, which can interfere with TV reception.
Double images or ghosts	❏ Check your outdoor antenna or call your cable service.

Audio

Problem	Possible Remedies
Good picture, no sound	❏ Press MUTING so that Muting disappears from the screen (page 3). ❏ Check your Audio settings. Your TV may be set to Auto SAP in the MTS feature (page 29). ❏ Make sure the speaker option is set to On in the Audio Menu. ❏ Adjust TV's volume.
Low or no audio (TV and Cable box)	❏ Some cable boxes have volume level controls. Check and see if your cable box or cable box remote has a volume control.

Channels

Problem	Possible Remedies
I cannot receive higher number channels (UHF) when using an antenna	❏ Make sure **Cable** is set to Off in the Channel menu (page 31). ❏ Perform Auto Program to add channels that are not presently in the memory (page 23).
Cable stations don't seem to work	❏ Make sure **Cable** is set to On in the Channel menu (page 31). ❏ Perform Auto Program to add channels that are not presently in the memory (page 23).

Contacting Sony

Before calling our Customer Information Services Center, reset the TV to factory settings (see page 23). Please have your TV serial number ready. The number is located on the rear of your TV and on the front cover of this manual.

Our Customer Information Services Center phone number is 1-877-899-SONY (7669) (US residents only) or (416) 499-SONY (7669) (Canadian residents only).

Manual de instrucciones

KV-29FS120

KV-29FA310

Lea este manual antes de operar el producto.

ADVERTENCIA

Para evitar el riesgo de incendio o descarga eléctrica, no exponga el televisor a la lluvia o humedad.

Este símbolo señala al usuario la presencia de voltaje peligroso sin aislamiento en el interior del aparato de tal intensidad que podría presentar riesgo de descarga eléctrica.

Este símbolo indica al usuario que el manual que acompaña a este aparato contiene instrucciones importantes referentes a su funcionamiento y mantenimiento.

Nota para el instalador de CATV

Esta nota pretende llamar la atención del instalador del sistema CATV en relación con el artículo 820-40 de la NEC que proporciona las pautas para una adecuada conexión a tierra y, en particular, especifica que el cable de conexión a tierra debe estar conectado al sistema de toma de tierra del edificio lo más cerca posible de la entrada del cable.

PRECAUCIONES DE SEGURIDAD

- ❏ Utilice el televisor con ca (corriente alterna) como se menciona a continuación para todos los países excepto en donde se indique:
  ca 120 V 60 Hz
  ca 220 V 50/60 Hz (Chile, Perú, Bolivia)
- ❏ Una terminal del enchufe es más ancha que la otra para garantizar la seguridad y solo se podrá introducir en la toma de corriente de una manera (sólo los modelos con ca 120 V). Si no puede insertar completamente el enchufe en la toma, póngase en contacto con su proveedor.
- ❏ Si se introduce algún objeto sólido o líquido en el televisor, desconéctelo y haga que sea revisado por personal especializado antes de volver a utilizarlo.

PRECAUCION

PARA EVITAR DESCARGAS ELÉCTRICAS, INTRODUZCA EL ENCHUFE EN EL TOMACORRIENTE POR COMPLETO, CON EL CONTACTO ANCHO DEL ENCHUFE EN LA RANURA ANCHA DEL TOMACORRIENTE.

Al usar videojuegos, computadoras y productos similares con el televisor, mantenga los ajustes de brillo y contraste a un nivel moderado. Si una imagen inmóvil permanece en la pantalla durante un periodo prolongado con elevada intensidad de brillo o contraste, la imagen podría quedar grabada en la pantalla en forma permanente. Igualmente, ver continuamente el mismo canal de televisión podría dejar grabada en la pantalla el logotipo de la emisora. La garantía no cubre este tipo de anomalías, ya que se deben al mal uso del aparato.

Para reducir el riesgo de descarga eléctrica, no utilice el enchufe polarizado con un cable de extensión, un receptáculo ni otras tomas, a menos que las terminales estén bien insertadas y no queden expuestas.

Se advierte que cualquier cambio o modificación que no se apruebe de modo explícito en este manual podría anular su autorización para utilizar este equipo.

NOTIFICACION

Este aparato ha sido debidamente probado, comprobándose que cumple con los límites impuestos a dispositivos digitales Clase B de acuerdo con la Sección 15 de las normas de la FCC. Estos límites se establecieron para ofrecer protección razonable contra interferencias perjudiciales en las instalaciones residenciales. Este aparato genera, usa y puede emitir energía radioeléctrica. De no instalarse y utilizarse de acuerdo con las instrucciones correspondientes, podría producir interferencias perjudiciales en las radiocomunicaciones. No obstante, no puede garantizarse que no se produzcan estas interferencias en una instalación determinada. Si este aparato llega a interferir en la recepción de radio o televisión, lo que podrá comprobarse encendiendo y apagando el aparato, se recomienda al usuario intentar corregir la interferencia mediante una o más de las siguientes medidas:

- ❏ Reoriente o cambie de lugar las antenas receptoras.
- ❏ Aumente la distancia que separa este aparato del receptor afectado.
- ❏ Conecte el aparato en una toma de corriente de un circuito distinto al que esté conectado el receptor que está afectado.
- ❏ Consulte con el distribuidor o solicite los servicios de un técnico capacitado en radio y televisión.

Cualquier cambio o modificación que no se detalla expresamente en el presente manual podría invalidar su autorización para emplear este aparato.

Protección del televisor

- ❏ Para evitar el sobrecalentamiento interno, no obstruya los orificios de ventilación.
- ❏ No instale el televisor en un lugar con temperatura elevada, humedad, exceso de polvo o donde puedan producirse vibraciones.

Nota sobre Caption Vision

Este receptor de televisión proporciona pantalla de televisión con visualización de subtítulos de acuerdo con el punto § 15.119 del reglamento de la FCC.

El uso del televisor con finalidades distintas a la visualización privada de emisiones de programas en UHF o VHF o transmisiones vía cable dirigidas al público en general puede requerir la autorización de la compañía de emisión por cable y/o del propietario del programa.

Información para el propietario

Los números de serie y modelo están situados en la portada de este manual y en la parte posterior del televisor.

Marcas comerciales y derechos de autor

ENERGY STAR® es una marca registrada.

En calidad de compañía asociada a ENERGY STAR®, Sony ha determinado que este producto o modelo de producto cumple con las directrices de uso eficiente de energía de ENERGY STAR®.

Normas importantes sobre seguridad

Para su protección, lea detenidamente estas instrucciones y guarde este manual para futuras consultas.
Lea cuidadosamente todas las advertencias y precauciones y siga las instrucciones inscritas en el televisor o descritas en el manual de instrucciones o de reparación.

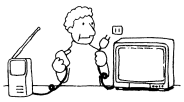
ADVERTENCIA

Para protegerse contra daños personales, siga las precauciones de seguridad básicas durante la instalación, la utilización y el mantenimiento del televisor indicadas a continuación.

USO

Fuentes de alimentación

Este televisor solamente deberá alimentarse con el tipo de fuente de alimentación indicado en la etiqueta de serie/modelo. Si no está seguro sobre el tipo de red eléctrica de su hogar, consulte a su proveedor o a la compañía de suministro eléctrico local. En caso de un televisor diseñado para alimentarse con baterías, consulte su manual de instrucciones.



Conexión a tierra o polarización

Este aparato cuenta con cable eléctrico con clavija polarizada (con una terminal más ancha que la otra), o con tres terminales (la tercera es para la conexión). Siga las instrucciones indicadas a continuación:

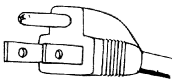
Para los equipos con un enchufe de cable de alimentación de ca polarizado

El enchufe se introduce en la toma de corriente en una única dirección. Se trata de una característica de seguridad. Si no puede insertar completamente el enchufe en la toma, intente girar el enchufe. Si sigue teniendo problemas para insertar el enchufe, póngase en contacto con su electricista para que le instale una toma adecuada. No ponga a prueba la finalidad de seguridad del enchufe polarizado forzándolo.

Advertencia alternativa

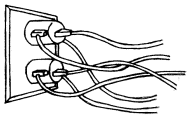
Para los equipos con un enchufe de ca con tres cables de conexión de tierra

Este enchufe únicamente se acoplará a una toma de corriente de conexión a tierra. Se trata de una característica de seguridad. Si no puede insertar el enchufe en la toma, póngase en contacto con su electricista para que le instale una toma adecuada. No ponga a prueba la seguridad del enchufe de conexión a tierra.



Sobrecarga

No sobrecargue las tomas de pared, los cables de extensión ni los receptáculos más allá de su capacidad, puesto que podría producirse un incendio o una descarga eléctrica. Apague siempre el aparato cuando no lo utilice. Si no va a utilizar el aparato durante un tiempo prolongado, desconéctelo de la toma de pared como precaución ante la posibilidad de que se produzca un mal funcionamiento interno que pueda provocar un incendio.



No desconecte la antena ni el cable de alimentación en caso de tormenta. Los relámpagos podrían descargar mientras sujeta el cable y provocarle lesiones graves. Apague el televisor y espere que el tiempo mejore.

Introducción de objetos y líquidos

No introduzca objetos de ningún tipo a través de las ranuras del gabinete, ya que podrían tocar puntos de tensión peligrosa o provocar cortocircuitos de piezas, lo que podría resultar en incendios o descargas eléctricas. No derrame nunca ningún tipo de líquido sobre el televisor.

Accesorios

No utilice ningún accesorio no recomendado por el fabricante, ya que podría ser peligroso.
No coloque ningún tipo de objetos, especialmente objetos pesados, encima del aparato. Podrían caerse del aparato y causar lesiones.

Limpieza

Antes de limpiar el televisor, desconéctelo de la alimentación. No utilice limpiadores líquidos ni aerosoles. Para limpiar el exterior del televisor, emplee un paño ligeramente humedecido en agua.

Si se produce un ruido continuo o intermitente en el interior del aparato de televisión mientras está en funcionamiento, desconecte el televisor y póngase en contacto con el proveedor o con el servicio de asistencia técnica. Es normal que algunos aparatos de televisión produzcan ocasionalmente este tipo de ruidos, especialmente cuando se conectan y desconectan.

Instalación

Para levantar o mover el aparato siempre se deberá hacer entre dos o más personas. El aparato es pesado y la superficie inferior es plana. Si intenta mover el aparato sin ayuda o lo manipula de forma insegura, puede producirse lesiones graves. Instale el aparato sobre una superficie plana y estable.

Agua y humedad

No utilice aparatos de alimentación eléctrica cerca del agua — por ejemplo, cerca de una bañera, un lavabo, un fregadero o una lavadora, en un sótano húmedo, ni cerca de una piscina, etc.

Colocación

No coloque el televisor sobre una mesita con ruedas, un pedestal, una mesa o un estante inestable. El televisor podría caer, causando daños serios a niños, adultos y al propio televisor. Utilice solamente la mesita de ruedas o soporte recomendado por el fabricante para el modelo específico. La combinación de un televisor y un mueble con ruedas deberá moverse con cuidado. Las paradas bruscas, la fuerza excesiva y las superficies desiguales pueden hacer que el aparato y el mueble volqueen.

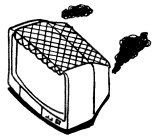
Desconecte todos los cables del aparato antes de intentar moverlo.

No permita que niños o animales se suban encima del aparato o lo empujen. El aparato podría caerse y causar lesiones graves.

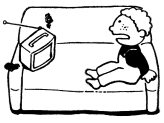
Ventilación

Las ranuras y aberturas en la parte posterior o inferior del televisor son para permitir la ventilación necesaria. Para asegurar la operación fiable del televisor y protegerlo contra el sobrecalentamiento, estas ranuras y aberturas no deberán cubrirse ni bloquearse nunca.

❑ No tape las ranuras ni aberturas con paños ni otros materiales.



❑ No bloquee las ranuras ni aberturas colocando el televisor sobre una cama, sofá, alfombra u otras superficies similares.



❑ No coloque el televisor en un lugar cerrado, como en un librero o un mueble empotrado, a menos que esté adecuadamente ventilado.

❑ No coloque el televisor cerca, ni sobre un radiador o una salida de aire caliente, ni expuesto a la luz solar directa.

Protección del cable de alimentación

No permita que ningún objeto quede sobre el cable de alimentación, ni coloque el televisor donde el cable pueda quedar sometido a desgaste o presión.

Conexión a tierra o polarización

Este aparato puede estar equipado con un enchufe de línea de corriente alterna polarizado (con una terminal más ancha que la otra). El enchufe sólo se puede introducir en la toma de corriente en una dirección. Se trata de una característica de seguridad. Si no puede insertar completamente el enchufe en la toma, intente girarlo. Si sigue teniendo problemas para introducir el enchufe, póngase en contacto con su electricista para que sustituya la toma obsoleta. No ponga a prueba la seguridad del enchufe polarizado.

Antenas

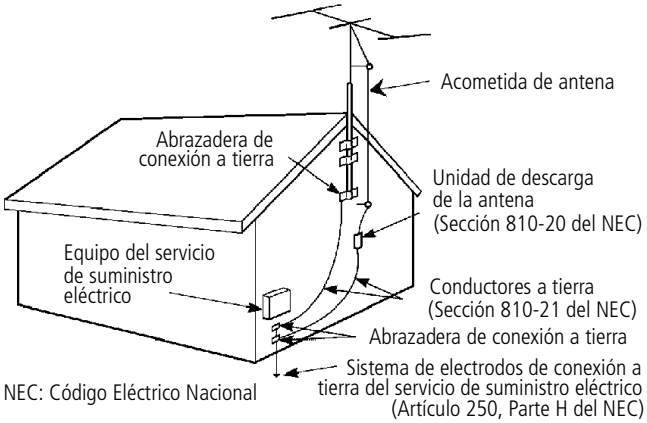
Conexión a tierra de una antena exterior

Para instalar una antena exterior, siga los procedimientos que se indican a continuación. Los sistemas de antenas exteriores no deben situarse cerca de líneas eléctricas o circuitos de alimentación o luz eléctrica, o bien donde pueda entrar en contacto con dichas líneas eléctricas o circuitos.

CUANDO INSTALE UN SISTEMA DE ANTENA EXTERIOR, EXTREME LAS PRECAUCIONES Y MANTÉNGALO ALEJADO DE DICHAS LINEAS ELECTRICAS O CIRCUITOS, DADO QUE EL CONTACTO PUEDE RESULTAR FATAL.

Asegúrese de que el sistema de antena tiene conexión a tierra para proporcionar protección contra los incrementos de voltaje y el aumento de las cargas estáticas. El apartado 810 del Código Eléctrico Nacional (NEC) en EE.UU. y el apartado 54 del Código eléctrico de Canadá proporcionan información relativa a la conexión a tierra adecuada del mástil y de la estructura de soporte, la conexión a tierra del cable de conexión a la unidad de descarga de la antena, el tamaño de los conductores de la conexión a tierra, la ubicación de la unidad de descarga de la antena, la conexión de los electrodos de conexión a tierra y los requisitos de los electrodos de conexión a tierra.

Conexión a tierra de la antena de acuerdo con el Código Eléctrico Nacional, ANSI/NFPA 70



NEC: Código Eléctrico Nacional

Descargas Eléctricas

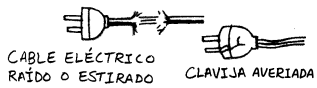
Para mayor protección del receptor de televisión durante una tormenta con descarga eléctrica o cuando no se utiliza durante largos periodos de tiempo, desconéctelo de la toma de pared y desconecte la antena. Con ello evitará que los rayos y los incrementos de voltaje dañen el receptor.

Reparación

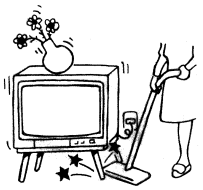
Daños que requieren reparación

Desconecte el aparato de la toma de pared y haga que sea revisado por personal calificado cuando se produzcan las siguientes condiciones:

❑ Si el cable de alimentación o el enchufe están dañados o deshilachados.



❑ Si se ha vertido líquido en el interior del aparato o si se han caído objetos en el interior del producto.



❑ Si el aparato se ha expuesto a lluvia o agua.

❑ Si el aparato se ha caído y ha sufrido golpes excesivos o si se ha dañado la unidad.

❑ Si el aparato no funciona con normalidad al seguir las instrucciones del manual. Ajuste solamente los controles que se especifican en el manual de instrucciones. El ajuste inadecuado de otros controles puede provocar daños y a menudo requerirá mucho trabajo por parte de un técnico calificado para restablecer el funcionamiento normal del aparato.

❑ Si el aparato muestra un cambio de rendimiento significativo, debe repararse.

Asistencia técnica

No intente reparar por sí mismo el aparato ya que al abrir el gabinete se vería expuesto a tensiones peligrosas y otros riesgos. Solicite los servicios de personal de reparación calificado.

Piezas de reemplazo

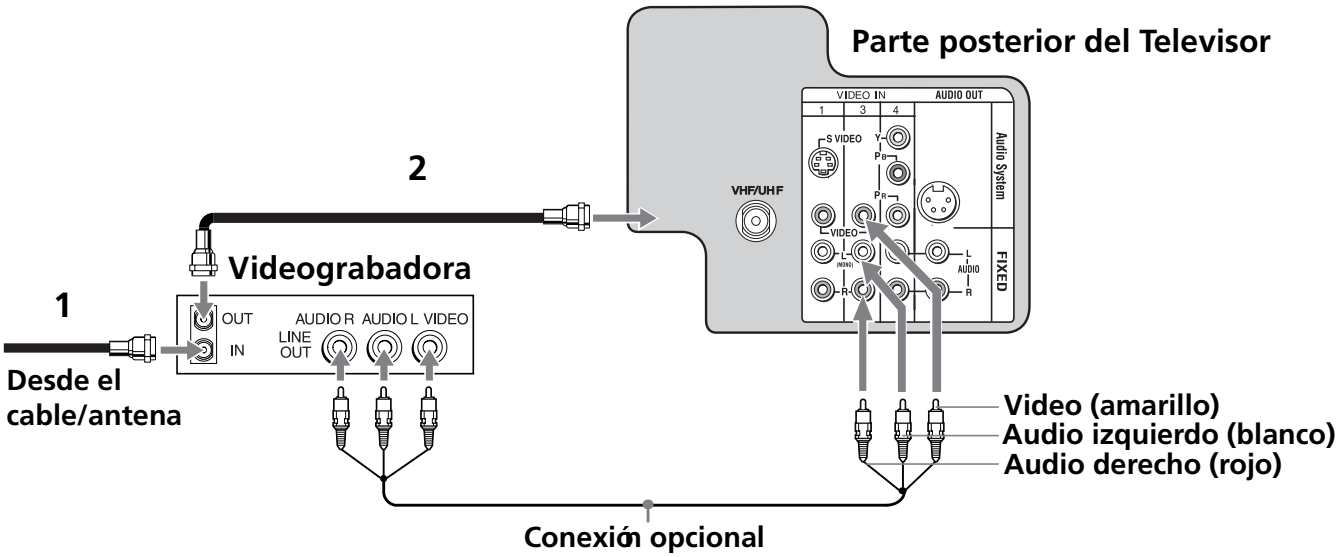
Si necesita piezas de reemplazo, asegúrese de que el técnico certifique por escrito que ha utilizado piezas de reemplazo especificadas por el fabricante con las mismas características que las piezas originales. El uso de piezas no autorizadas puede provocar incendios, descargas eléctricas y otros peligros.

Comprobación de seguridad

Después de realizar cualquier reparación del aparato, solicite al técnico de la reparación que realice comprobaciones rutinarias de seguridad (como especifica el fabricante) para determinar si el aparato se encuentra en condiciones seguras de funcionamiento y certificarlo. Cuando el aparato llega al final de su vida útil, debe desecharse adecuadamente para evitar una implosión del tubo de la imagen. Consulte a un técnico de reparación calificado para depositar el aparato.

Conexión de equipo adicional

Conexión de un Televisor y una Videograbadora



1 Conecte el cable coaxial de la antena o del sistema de cable (sistema de televisión por pago) a la toma de la videograbadora.

2 Conecte el cable coaxial (no incluido) de la toma OUT de la videograbadora a la toma VHF/UHF del televisor.

Conexión opcional

- ❏ Si la videograbadora dispone de salidas de video, puede obtener una mejor calidad de imagen conectando los cables de audio/video (no incluidos) desde la salida AUDIO/VIDEO OUT de la videograbadora a la toma AUDIO/VIDEO IN del televisor.
- ❏ Para obtener una mejor calidad de imagen, utilice S VIDEO en lugar del cable amarillo de video. Como S VIDEO no proporciona sonido, debe mantener conectados los cables de audio.

Utilizando su televisor con estas conexiones

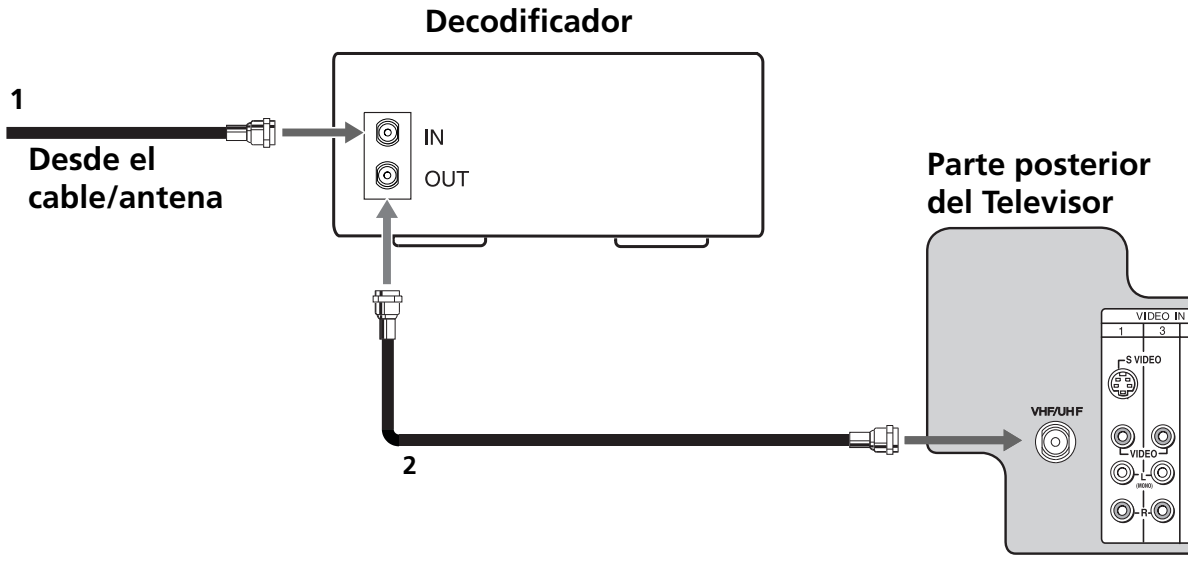
Esta conexión le permite hacer lo siguiente:

- ❏ Programar su control remoto Sony para operar su videograbadora (ver página 7).
- ❏ Para activar su remoto presione VCR/DVD (del area de FUNCTION) para operar su videograbadora (ver página 5). Para hacer esto, primero programe su control remoto, entonces use la función de Fijar Canal para programar su televisor al canal 3 o 4 (ver página 34).
- ❏ Presione TV/VIDEO repetidas veces para cambiar entre la toma de la videograbadora (VIDEO input) y VHF/UHF (canales locales).

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

Conexión de un Televisor y Decodificador

Algunos sistemas de televisión por cable usan señales codificadas que requieren un decodificador para poder ver todos los canales. Si está suscrito a ese tipo de sistema de televisión por pago, utilice esta conexión. Si algunos de sus canales están codificados, tome en consideración la posibilidad de utilizar la conexión del decodificador y cable.



1 Conecte el cable coaxial de su sistema de televisión por pago a la toma IN del Decodificador.

2 Conecte un cable coaxial (no incluido) desde la toma OUT del decodificador a la toma VHF/UHF del televisor.

Utilizando su televisor con estas conexiones

Esta conexión le permite hacer lo siguiente:

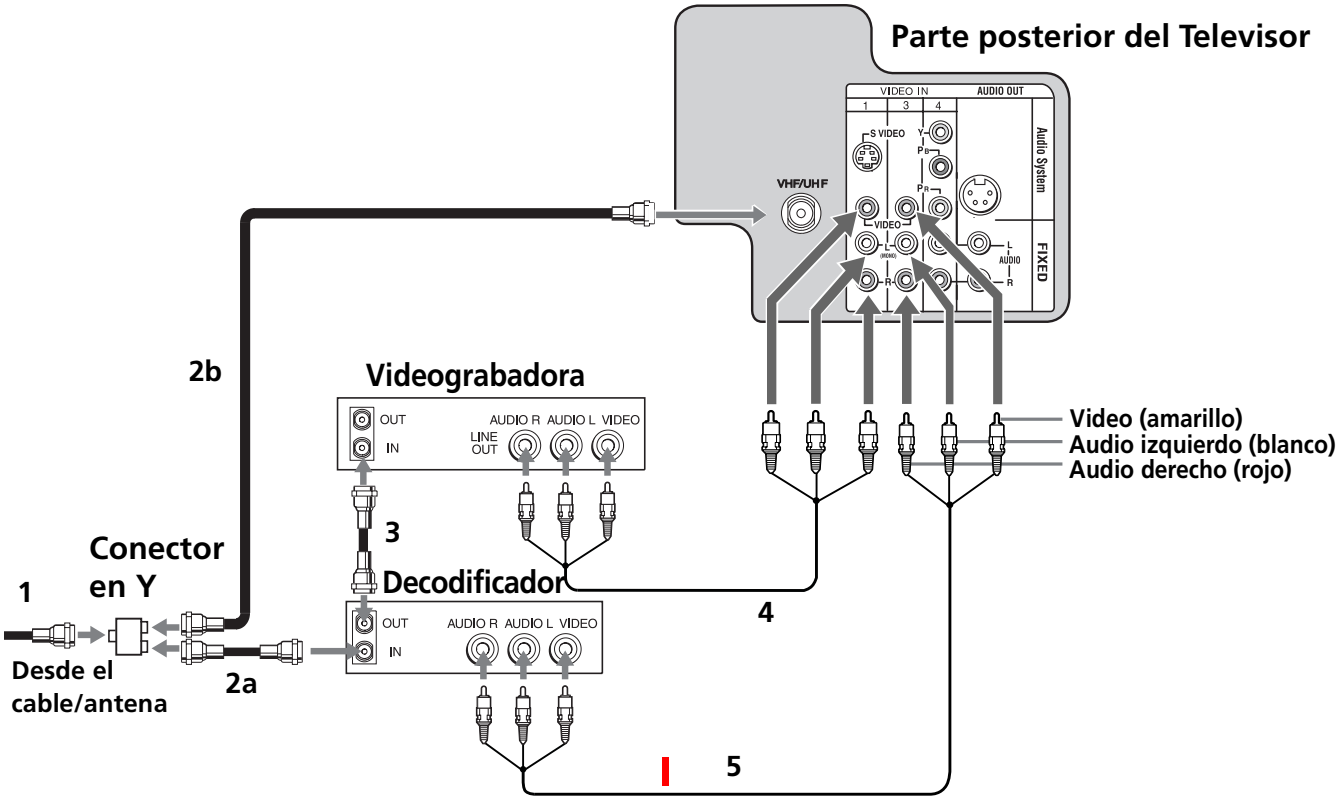
- ❏ Programar su control remoto Sony para operar su decodificador (ver página 5).
- ❏ Para activar su remoto presione SAT/CABLE (del area de FUNCTION) para operar su decodificador; use los botones del ⓪-⑨ o el botón CH+/- para cambiar los canales. Para hacer esto, primero programe su control remoto, entonces use la función de Fijar Canal para programar su televisor al canal 3 o 4 (ver página 34).

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

Conexión de un Televisor, una Videograbadora y un Decodificador

Utilice esta conexión si está suscrito a un sistema de televisión de pago que codifique algunos canales pero no todos. Esta configuración le permite utilizar el control remoto para:

- ❏ Cambiar el canal con el decodificador o la videograbadora mientras recibe una señal codificada.
- ❏ Cambiar el canal con el televisor.



1 Conecte la toma de entrada del conector en Y (no incluido) a su conexión de entrada del sistema de cable.

2 Con un cable coaxial (no incluido), conecte las dos tomas de salida del conector en Y a:

a) La toma IN del decodificador.

b) La toma VHF/UHF del televisor.

3 Conecte la toma OUT del decodificador a la toma IN de la videograbadora con un cable coaxial (no incluido).

4 Utilice los cables de AUDIO/VIDEO (no incluidos), conecte el AUDIO/VIDEO OUT de su videograbadora al AUDIO/VIDEO IN de su televisor.

5 Utilice los cables de AUDIO/VIDEO (no incluidos), conecte el AUDIO/VIDEO OUT de su caja de cable al AUDIO/VIDEO IN de su televisor.

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

Conexión opcional

❏ Para obtener una mejor calidad de imagen, utilice S VIDEO en lugar del cable amarillo de video, siempre y cuando la videograbadora tenga salida de S-VIDEO. Como S VIDEO no proporciona sonido, debe mantener conectados los cables de audio.

Utilizando su televisor con estas conexiones

Estas conexiones le permiten hacer lo siguiente:

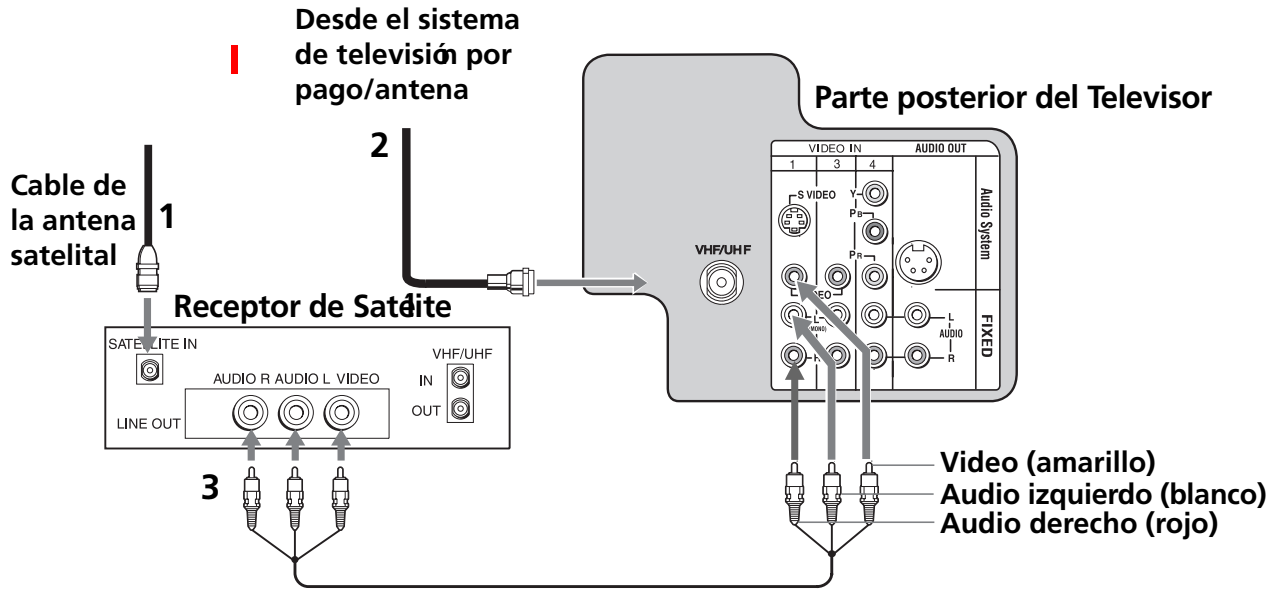
❏ Para usar el decodificador para cambiar canales, programe el televisor al canal 3 o 4. Use la función de fijar canal para asegurar que no cambie de canal accidentalmente (ver página 34).

❏ Programar su control remoto Sony para operar su videograbadora o decodificador (ver página 5).

❏ Para activar su control remoto presiona VCR/DVD (del área de FUNCTION) para operar su videograbadora o SAT/CABLE (del area de FUNCTION) para operar su decodificador.

❏ Presione TV/VIDEO varias veces para cambiar entre la toma de la videograbadora, (VIDEO input), VHF/UHF (canales locales o canales codificados) o su decodificador (sistema de cable o canales codificados).

Conexión de un Televisor y un Receptor de Satélite



1 Conecte el cable de la antena por satélite a la toma de SATELLITE IN del receptor de satélite.

2 Conecte el cable coaxial del servicio de cable o antena a la toma VHF/UHF del televisor.

3 Use cables de audio/video (no incluidos) para conectar las tomas AUDIO/VIDEO OUT del receptor de satélite a la toma de AUDIO/VIDEO IN del televisor.

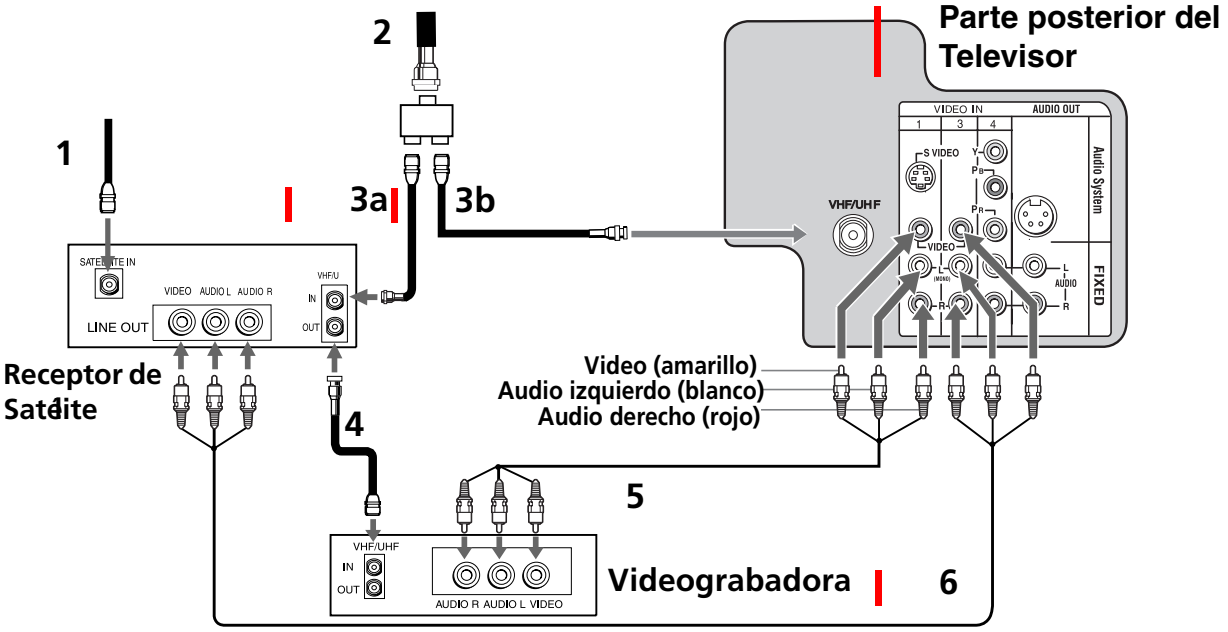
Utilizando su televisor con estas conexiones

Esta conexión le permite hacer lo siguiente:

- ❏ Programar su control remoto Sony para operar su receptor de satélite (ver página 5).
- ❏ Para activar su control remoto para operar su receptor de satélite presiona SAT/CABLE (del area de FUNCTION) (ver página 8).
- ❏ Presione TV/VIDEO repetidas veces para cambiar entre la toma del receptor de satélite (VIDEO input).

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

Conexión de un Televisor, Videograbadora y un Receptor de Satélite usando Video Compuesto (entradas de Video/Audio L,R)



1 Conecte el cable de la antena por satélite a la entrada SATELLITE IN del receptor de satélite.
2 Conecte el cable coaxial del sitema de cable o antena a la toma IN de la videograbadora.
3 Con un cable coaxial (no incluido), conecte las dos tomas de salida del conector en Y (no incluido) a:
  a) La toma IN del receptor de satélite
  b) La toma VHF/UHF de la videograbadora
4 Con un cable coaxial (no incluido), conecte la toma OUT del receptor de satélite al VHF/UHF IN de su videograbadora.
5 Con un cable de audio/video (no incluidos), conecte la toma de AUDIO/VIDEO OUT de su videograbadora a la toma AUDIO/VIDEO IN de su televisor.
6 Con un cable de audio/video (no incluido), conecte a la toma de AUDIO/VIDEO OUT de su receptor de satélite a la toma AUDIO/VIDEO IN de su televisor.

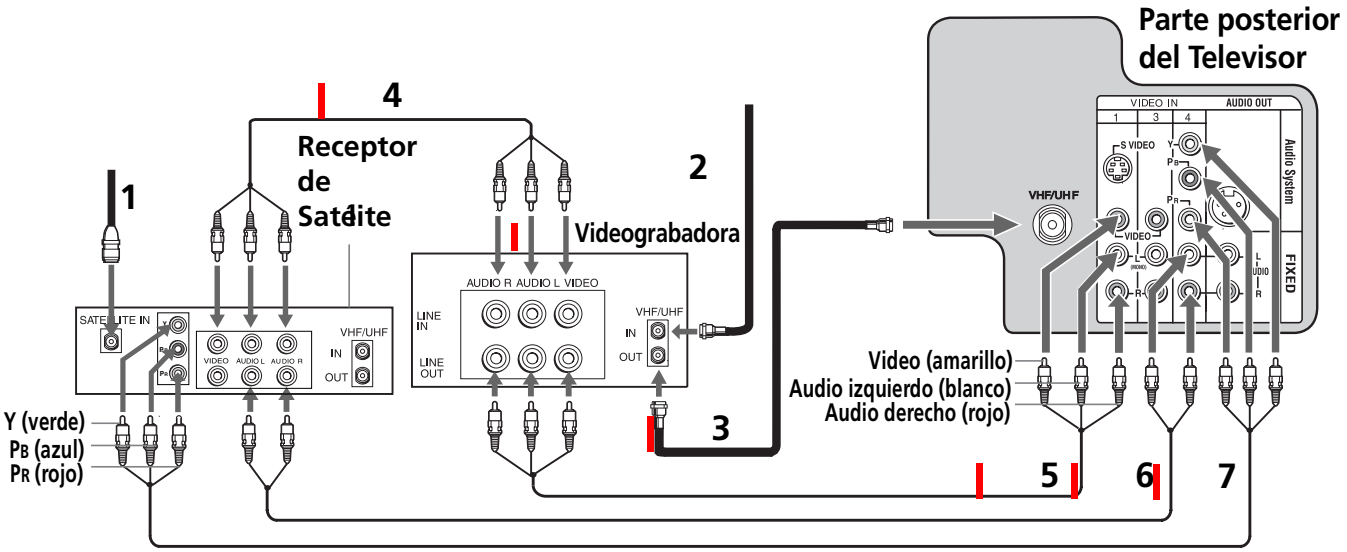
Utilizando su televisor con estas conexiones

Esta conexión le permite hacer lo siguiente:

- ❏ Programar su control remoto Sony para operar su videograbadora o receptor de satélite (ver página 5).
- ❏ Para que el receptor de satélite trabaje con esta conexión su videograbadora debe estar encendida.
- ❏ Para operar su videograbadora con el control remoto presione VCR/DVD o SAT/CABLE (del area de FUNCTION) botón para operar su receptor de satélite, (ver página 8).
- ❏ Presione TV/VIDEO varias veces para cambiar la toma de la videograbadora (VIDEO input), VHF/UHF (canales locales o canales codificados) o su decodificador (sistema de televisión por pago o canales codificados).

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

Conexión de un Televisor, Videograbadora y un Receptor de Satélite usando Video Componente (entradas Y, PB, PR/Audio L,R)



1 Conecte el cable de la antena por satélite a la entrada SATELLITE IN del receptor de satélite.

2 Conecte el cable coaxial del sistema de cable o antena a la toma IN de la videograbadora.

3 Conecte la toma OUT de la videograbadora a la toma VHF/UHF del televisor con un cable coaxial (no incluido).

4 Use cables de audio/video (no incluidos) para conectar las tomas de AUDIO/VIDEO OUT del receptor de satélite a la toma de AUDIO/VIDEO IN de la videograbadora.

5 Conecte las tomas AUDIO/VIDEO OUT de la videograbadora a las tomas AUDIO/VIDEO IN del televisor con cables de Audio/Video (no incluidos).

6 Conecte Y, PB, PR OUT de su receptor de satélite a Y, PB, PR IN del televisor con cables de componentes de video (no incluidos).

7 Conecte la toma AUDIO OUT del receptor de satélite a la toma AUDIO IN del televisor.

✍ Para ver las imágenes desde el receptor de satélite o la videograbadora, seleccione la entrada de video a la que esté conectado el receptor de satélite o la videograbadora presionando TV/VIDEO en el control remoto.

Utilizando su televisor con estas conexiones

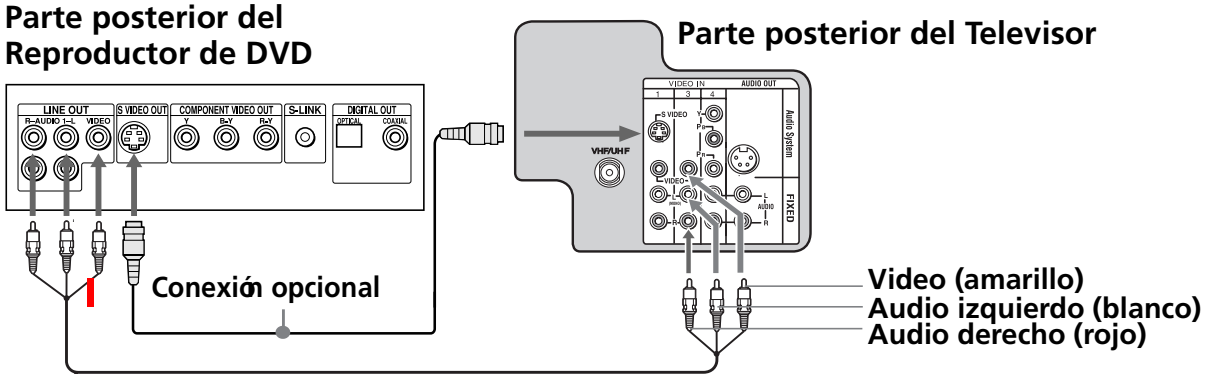
Esta conexión le permite hacer lo siguiente:

- ❏ Programar su control remoto Sony para operar su videograbadora o receptor de satélite (ver página 5).
- ❏ Para que el receptor de satélite trabaje con esta conexión su videograbadora debe estar prendida.
- ❏ Para operar su videograbadora con el control remoto presiona VCR/DVD o SAT/CABLE (del area de FUNCTION) botón para operar su receptor de satélite, (ver página 8).
- ❏ Presione TV/VIDEO varias veces para cambiar la toma de la videograbadora (VIDEO input), VHF/UHF (canales locales o canales codificados) o su decodificador (sistema de televisión por pago o canales codificados).

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

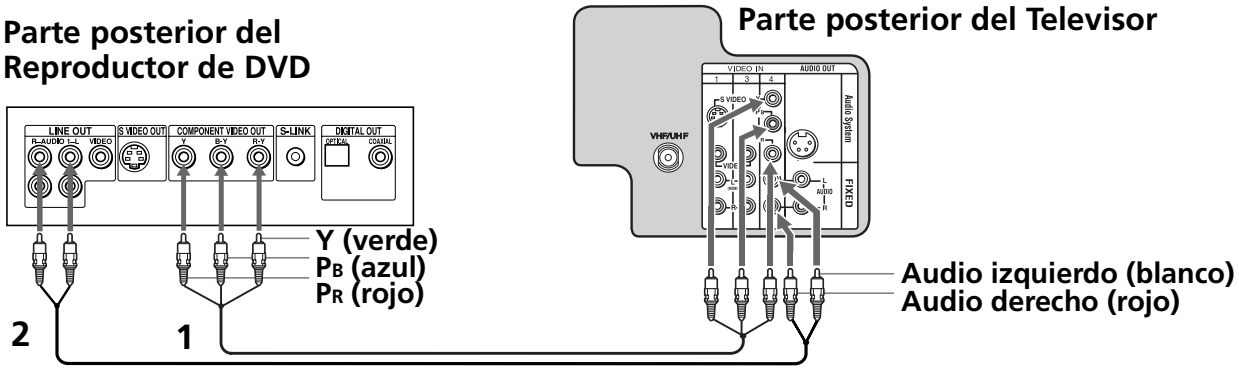
Conexión de un Reproductor de DVD

Use cables de audio/video (no incluidos) para conectar las tomas de AUDIO/VIDEO OUT del reproductor de DVD a la toma de VIDEO IN del televisor.



Conexión opcional

- ❏ Para obtener una mejor calidad de imagen, utilice S VIDEO en lugar del cable amarillo de video. Como S VIDEO no proporciona sonido, debe mantener conectados los cables de audio.
- ❏ Si el reproductor de DVD tiene salidas de video para componentes (Y, P_B, P_R), puede optimizar la calidad de imagen con cables de video para componentes (480i únicamente).



1 Conecte Y, P_B, P_R OUT de su reproductor de DVD a Y, P_B, P_R IN del televisor con cables de componentes de video (no incluidos).

2 Conecte la toma AUDIO OUT del reproductor de DVD a la toma AUDIO IN del televisor.

✍ Las salidas Y, P_B, P_R del reproductor de DVD en ocasiones están marcadas Y, C_B y C_R o Y, B-Y, y R-Y. En tal caso, conecte los cables según el color de las tomas.

Utilizando su televisor con estas conexiones

Esta conexión le permite hacer lo siguiente:

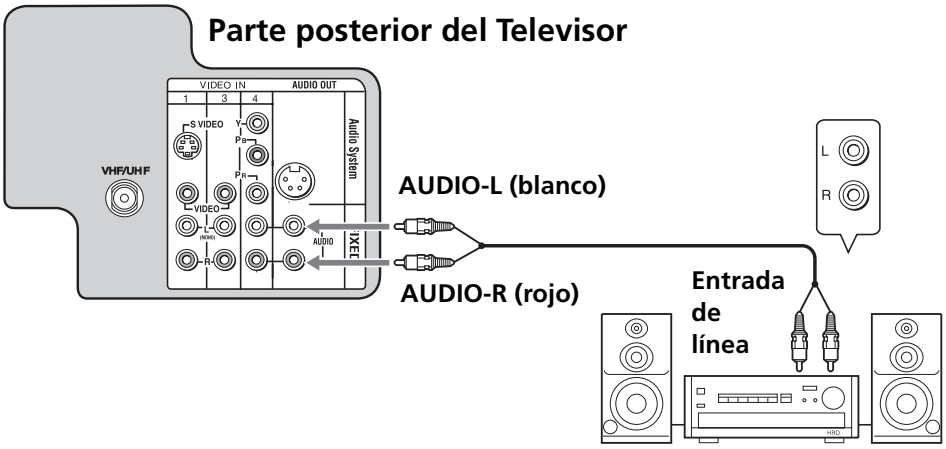
- ❏ Programar su control remoto Sony para operar su reproductor de DVD (ver página 5).
- ❏ Para activar su control remoto presiona VCR/DVD (del area de FUNCTION) para operar su DVD, (ver página 7).
- ❏ Presione TV/VIDEO varias veces para cambiar la toma del DVD (VIDEO input).

Conexión de un sistema de Audio

✍ Si conecta un sistema de Home Theater vea el manual de éste para conecciones adicionales.

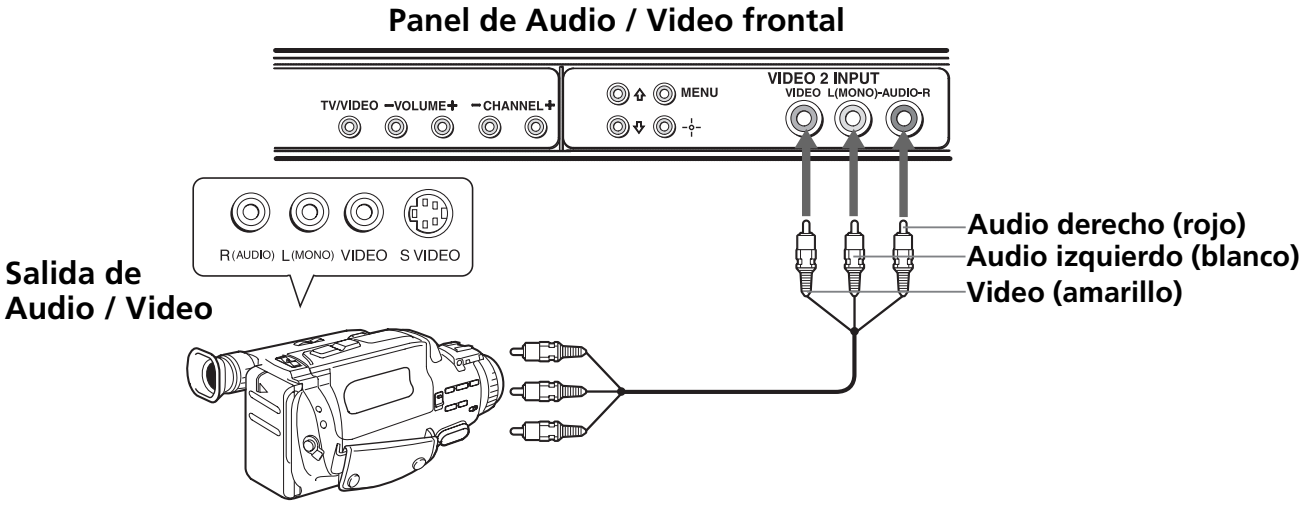
1 Usando los cables de audio/video (no incluidos), conecte el AUDIO OUT de su televisor a una de las tomas no usadas (TV, AUX, TAPE2) en su estéreo.

2 Ajuste el equipo de sonido a la entrada de línea seleccionada. Consulte "Uso del Menú de Audio" en la pagina 31 para obtener más instrucciones sobre la configuración del audio.



Conexión de una Cámara de Video

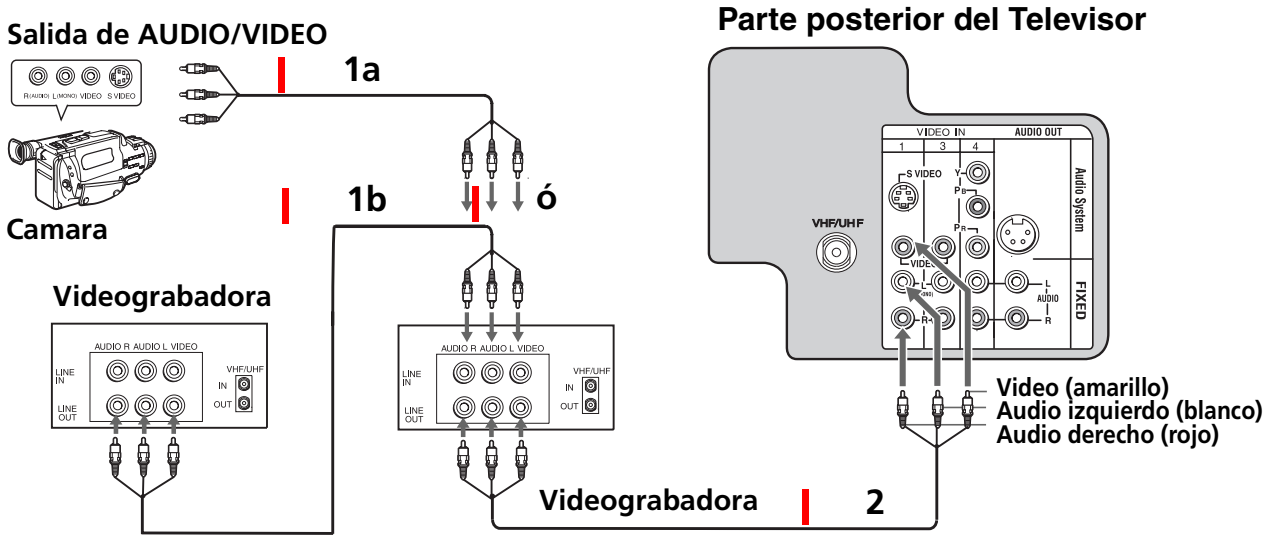
Para conectar su videocámara usted puede usar la toma del panel frontal del televisor o la toma del panel posterior del televisor Audio/ Video. Usando los cables de AUDIO/ VIDEO OUT (no incluido), conecte el AUDIO/VIDEO OUT de su videocámara a la toma de AUDIO/ VIDEO IN en su televisor.



Conexión opcional

❑ Para obtener una mejor calidad de imagen, use S VIDEO en lugar del cable amarillo de video. Como S VIDEO no proporciona sonido, debe mantener conectados los cables de audio.

Conexión para editar Videocintas (videograbadora y camara de video)



1 Para editar una videocinta conecte a la videograbadora las siguientes aparatos (videograbadora o camara de video).

a) Con un cable de audio/video (no incluido) conecte AUDIO/VIDEO OUT de su camara de video al AUDIO/VIDEO IN de su videograbadora (para grabar).

b) Con un cable de audio/video (no incluido) conecte AUDIO/VIDEO OUT de la videograbadora (para reproducir) al AUDIO/VIDEO IN de su videograbadora (para grabar).

2 Con un cable de audio/video (no incluido) conecte AUDIO/VIDEO OUT de su videograbadora (para grabar) al AUDIO/VIDEO IN de su televisor.

3 Con un cable de audio/video (no incluido) conecte AUDIO/VIDEO OUT de su videograbadora (para grabar) al AUDIO/VIDEO IN de su televisor.

Utilizando su televisor con estas conexiones

Esta conexión le permite hacer lo siguiente:

- ❏ Programar su control remoto Sony para operar su videograbadora (ver página 5).
- ❏ Para activar su control remoto presione TV/VIDEO para operar su videograbadora (ver pagina 5 para operar otras funciones).

✍ Receptor de satélite y el servicio de cable son sistemas de televisión de pago.

Información Adicional

Solución de problemas

Si tiene problemas con el televisor, intente seguir las indicaciones que se sugieren a continuación. Si el problema persiste, consulte con su proveedor Sony más cercano.

General

Problema	Posibles Soluciones
Hace falta restablecer los ajustes de fábrica	❑ Encienda el televisor, mientras mantenga oprimido el botón RESET del control remoto, oprima el botón de POWER (encendido/apagado) del panel frontal del televisor (el televisor se apagará). Suelte el botón RESET. Encienda el televisor.
El televisor está sucio	❑ Limpie el televisor con un paño suave y seco. Nunca use solventes fuertes como diluyentes o bencina, puesto que pueden dañar el acabado de la unidad.
Aparece un cuadro negro en la pantalla	❑ Está seleccionada una opción de texto en el menú de Ajustes (página 37) y no hay texto disponible. Para desactivar esta función, seleccione No en la opción Caption Vision (subtítulos). Si desea ver subtítulos, escoja CC1-4 en lugar de Text1-4.

Control Remoto

El Control Remoto no funciona	❑ Al operar su televisor oprima TV (FUNCTION). ❑ Vea si instaló las baterías correctamente. ❑ Las baterías pueden estar bajas. Sustitúyalas (página 2). ❑ Aleje el televisor por lo menos 1 metro de cualquier lámpara fluorescente.
No se puede cambiar el canal con el control remoto	❑ Asegúrese de que no ha cambiado el televisor del canal 3 o 4 con otro dispositivo para cambiar canales. ❑ Si está usando otro aparato para cambiar los canales, no olvide presionar el botón FUNCTION correspondiente a ese aparato. Por ejemplo, si está usando su videograbadora para controlar los canales, asegúrese de presionar los botones VCR/DVD FUNCTION (página 3).
Perdió el control remoto	❑ Puede utilizar los botones del panel frontal de audio y video para acceder a los menús (página 2). Póngase en contacto con su proveedor Sony más cercano para solicitar uno de repuesto.
Más de un código ésta listado	❑ Introdúzcalos por separados hasta que encuentre el código correcto para su equipo.
Se desprogramó el control remoto cuando cambió las baterías	❑ Debe programar de nuevo el control remoto (página 5).

Video

No hay imagen ni sonido	❏ Asegúrese de que el cable de alimentación está conectado. ❏ Si hay luz roja que parpadea en la parte frontal del televisor durante unos minutos, desconecte y vuelva a conectar el cable de alimentación para restaurar el televisor. Si el problema persiste llame al servicio técnico local. ❏ Compruebe los ajuste de TV/VIDEO; si ve la televisión, póngalo en TV; si ve imágenes de un aparato de video, póngalo en VIDEO 1,2,3 o 4 (página 3). ❏ Intente ver otro canal para descartar algún problema en la emisora.
Imagen de mala calidad, sin Imagen, buen sonido	❏ Ajuste el contraste en el menú de video (página 30). ❏ Ajuste el brillo en el menú de video (página 30). ❏ Compruebe las conexiones de la antena o de televisión por pago (página 11).
Imagen pobre en color y nitidez	❏ Ajuste color en el menú de video (página 30). ❏ Ajuste nitidez en el menú de video (página 30). ❏ Asegúrese en el menú de video que la opción de “Intelligent Pic” se encuentre en la posición de “No” (página 30).
Sin color	❏ Ajuste color en el menú de video (página 30).
Sin señal	❏ Compruebe el ajuste de Cable en el menú de Canal (página 32). ❏ Compruebe las conexiones de la antena o de televisión por pago (página 11). ❏ Asegúrese de que el canal seleccionado esté emitiendo señal.
Líneas de puntos o rayas	❏ Ajuste la antena. ❏ Aparte el televisor de cualquier otro equipo electrónico. Algunos equipos electrónicos crean ruido eléctrico que puede interferir con la recepción del televisor.
Imágenes dobles o fantasmas	❏ Revise la antena exterior o llame al servicio técnico de televisión por pago.

Audio

Buena imagen, sin sonido	❏ Presione MUTING para que desaparezca Muting de la pantalla (página 3). ❏ Compruebe los ajustes de Audio. Es posible que el televisor esté ajustado en Auto SAP o Bocinas se encuentre en la posición No (página 32).

Canales

No se reciben canales con un número alto (UHF) cuando se utiliza una antena	❏ Asegúrese de que Cable está en la posición No en el menú de Canal (página 33). ❏ Ejecute auto programación para añadir canales que actualmente no estén en la memoria (página 25).
Parece que no funcionan las emisoras de cable	❏ Asegúrese de que Cable esté en la posición Si en el menú de Canal (página 33). ❏ Ejecute Auto programación para añadir canales que actualmente no estén en la memoria (página 25).

Si después de leer este manual de instrucciones, tiene más preguntas relacionadas con el uso del televisor Sony, póngase en contacto con su proveedor Sony más cercano para recibir asistencia técnica.

¡MUY IMPORTANTE!

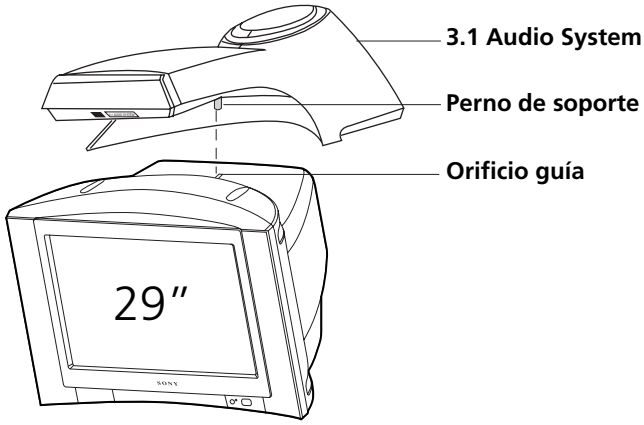
Guía Rápida de Conexión

3.1 Audio System

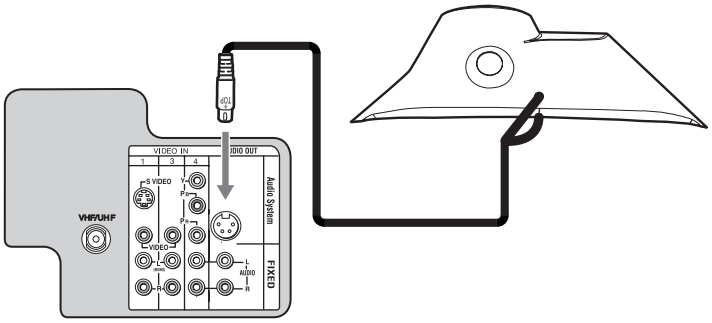
(bocina central y subwoofer externo)*

- Desconecte el televisor antes de conectar el 3.1 Audio System.
- No se debe conectar en la terminal indicada del televisor ningún otro aparato diferente al 3.1 Audio System; esto podría provocar un mal funcionamiento.
- El 3.1 Audio System no debe ser conectado a ningún otro aparato.

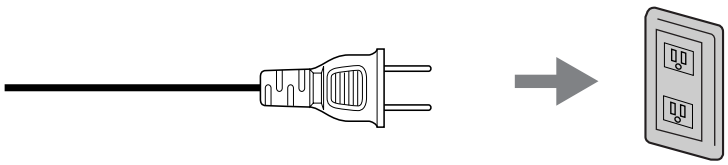
1 Introduzca el perno de soporte del 3.1 Audio System en el orificio guía que se encuentra en la parte superior del televisor.



2 Conecte el cable del 3.1 Audio System en la terminal indicada que está en la parte posterior del televisor.



3 Conecte el televisor al tomacorriente.



Use sólo el cable suministrado, de otro modo su televisor no funcionará bien.

* 29” es equivalente a 73,66 cm
